Glossary

This glossary contains certain definitions of technical terms used in this report as they relate to the Group. Some of these definitions may not correspond to standard industry definitions or usage.

2G	Second-generation mobile networks, formed with digital radio technology to provide higher network capacity and improved voice quality and encryption, as well as seamless international roaming. The existing mobile communications network primarily comprises second-generation GSM and CDMA, which has a maximum data provision capacity of 115.2 Kbps with the adoption of the IS-95B technology of GSM, GPRS and CDMA, or 384 Kbps in case of the GSM system, which adopts the EDGE technology.
3G	Third-generation mobile networks supporting peak data rates of 144Kbps at mobile user speeds, 384Kbps at pedestrian user speeds and 2Mbps in fixed locations (peak speeds), although some initial deployments were configured to support just 64Kbps. ITU coordinates 3G standards through its IMT-2000 project and key standards bodies such as 3GPP and 3GPP2.
CDMA	Code division multiple access, one of the standards for 2G mobile communications. It is a spread spectrum technology standard that assigns a pseudo-noise (PN) code to all speech and data bits, sends a scrambled transmission of the encoded speech over the air and reassembles the speech in its original format. By assigning a unique correlating code to each transmitter, several simultaneous conversations can share the same frequency allocations.
FTTX	Abbreviation of “Fiber-to-the-X”, a collective name given to various methods for fiber access. FTTX commonly includes: FTTN (Fiber-to-the-Node), FTTC (Fiber-to-the-Curb), FTTB (Fiber-to-the-Building), FTTH (Fiber-to-the-Home).
GSM	A global system for mobile communications, a digital cellular phone system standard that originated in Europe. It is deployed in more than 170 countries and uses a TDMA radio propagation scheme.
TD-SCDMA	Time division synchronous code division multiple access, a 3G technology developed in China to support voice and data transmission.
WCDMA	Wideband CDMA, a UMTS standard for 3G digital mobile networks adopting CDMA technologies to provide enhanced capacity for voice with a theoretical maximum data rate of 3Mbps.
UMTS	A reference to WCDMA standards generally used in Europe. 3G technologies have been collectively referred to as UMTS (Universal Mobile Telecommunications System) by European Telecommunications Standards Institute (ETSI) since the early 1990s.
xPON	Optical access that applies WDM technology with optical fiber as transmission medium, enabling high access bandwidth and end-to-end POS (passive optical splitting) transmission. xPON has a significant edge over other optical access technology and comprises EPON and GPON.
Carrying network	Carrying level network that provides the basic carriage function for the services. It directs each service information flow from its source to the destination according to various service requirements and modulates network resources on the basis of the attributes of these requirements to ensure the functionality and performance of these services, providing QoS assurance and network safety assurance for communications of different types and natures.
Core network	A mobile network comprises a wireless access network and a core network, the latter of which provides services such as call control, billing and mobility.

Glossary

LTE	LTE (Long Term Evolution) refers to the long-term evolution of 3G technology with OFDM as the core, and is regarded as 4G in the making. LTE is being promoted by 3GPP and its major performance targets include maximum speeds of 100Mbps (download) and 50Mbps (upload) using 20MHz bandwidth.
IN	Service networks built on core networks and the Internet to provide voice and data value-added services for end-users, such as pre-payments, virtual private networks, call centers and SMS/MMS/WAP/payments and Internet of Things, etc.
IPTN	IP telecommunications network, a network solution based IP technologies and capable of meeting the needs of telecommunications operations with the provision of a diverse range of services. IPTN is a reengineering of traditional IP networks aimed at resolving QoS, safety and management issues of IP networks.
Internet of Things	A network interconnecting all things in the physical world, characterised by comprehensive sensors, reliable transmission and smart processing and aiming at connection among any objects at any time, any location. It can help to realise the organic integration of the human society with the physical world, so that humankind can manage production and life in a more detailed and dynamic way to generally enhance the level of informatisation of the society.
Cloud Computing	A concept underlining the fusion of traditional computing technologies (such as grid computation and distributive computation) with network technologies. The core idea is to centralise the management and modulation of massive computing resources connected through the network, forming a pool of computing resources that serve users on an as-needed basis. Cloud Computing is applied in commercial offerings such as SaaS, PaaS and IaaS.
Access network	In the public telecommunications network, the access network serves as an interface between the local exchange and the users, being primarily responsible for completing users' access to the core network. The access network is formed by a range of equipment between the service node interface (SNI) and the user network interface (UNI).
ICT	IT represents the technology for processing information, whereas CT represents the technology for communications (information transmission). ICT is a new product and service based on the fusion of information and communications technologies.

Report of the Board of Directors

The Board of Directors of the Company is pleased to present this interim report together with the financial statements of the Group for the six months ended 30 June 2011.

FINANCIAL RESULTS

Please refer to page 54 and page 180 of this report for the results of the Group for the six months ended 30 June 2011 prepared in accordance with PRC ASBEs and HKFRSs.

(I) REVIEW OF BUSINESS IN THE FIRST HALF OF 2011

1. Overview of the PRC telecommunications industry in the first half of 2011

During the first half of 2011, the year that marked the beginning of the nation's 12th Five-Year Plan, the three big carriers in domestic market showed varying emphases in their equipment investments, while certain carriers were somewhat slackened in opening tenders for certain equipment, as compared to previous years. For the six months ended 30 June 2011, the PRC telecommunications industry reported revenue from principal operations of RMB474.07 billion, representing a year-on-year growth of 10.1%, according to figures released by the Ministry of Industry and Information Technology in China.

2. Overview of the global telecommunications industry in the first half of 2011

During the first half of 2011, the global telecommunications industry continued to steer towards positive growth. There were signs that equipment investments were back on a growth track, focused largely on the construction of wireless/wireline broadband networks, while the planning for 3G network deployment was also getting to greater depths, although overall capital expenditure by carriers varied from region to region. A number of countries started to auction their LTE licenses, with the construction of commercial or trial LTE networks taking place in mature markets such as Europe, the U.S. and Japan, etc. The broadband strategies of developed countries had accelerated the progress of wireline broadband network, so as to meet public demand for high-speed bandwidth. As wireless broadband connection was becoming more popular, sales of smart terminals were growing at a much faster rate than ordinary terminals to account for an increasing proportion among all terminal products.

3. Operating results of the Group for the first half of 2011

The global telecommunications industry experienced a slow recovery in the first half of 2011. Industry competition intensified as ongoing advances were being made in product technology innovation. Leveraging its inherent competitive strengths, the Group secured stable and growing revenue from the domestic market, while gaining solidly in revenue from the international market, where we reported sustained revenue growth in carriers' networks and stronger increment in terminals and telecommunication software systems, services and other products. Nonetheless, gross profit margin and net profit conceded on a year-on-year basis under the Group's strategy to expand market shares in a pro-active manner. Operating revenue of the Group for the first half of 2011 amounted to RMB37.337 billion, representing a year-on-year growth of 21.52%. Net profit decreased 12.33% to RMB769 million. Basic earnings per share amounted to RMB0.27.

(1) *By market*

The domestic market

During the reporting period, the Group reported an operating revenue of RMB16.527 billion from the domestic market, representing a year-on-year growth of 6.83% and accounting for 44.26% of the Group's total operating revenue. Although there was a slowdown in overall investments in the domestic telecommunications industry, the Group ensured growth in operating revenue by improving the competitiveness of its products.

Report of the Board of Directors

The international market

During the reporting period, the Group reported an operating revenue of RMB20.810 billion from the international market, accounting for 55.74% of its total operating revenue and representing a year-on-year growth of 36.41%. The Group's diligent efforts in international market development came in a variety of ways. While locking up shares in emerging markets, we continued to make large-scale breakthroughs with global mainstream carriers through cooperations with these operators on products of different modes, assuring year-on-year growth in the Group's revenue from international business.

(2) By product

The Group registered year-on-year revenue growth of 8.01% for carriers' networks, 43.96% for terminal products and 42.29% for telecommunication software systems, services and other products during the reporting period.

Carriers' networks

During the first half of 2011 under review:

In wireless products, the Group actively participated in LTE tenders in the Asia Pacific, Europe and Latin America and secured contracts for large-scale commercial or trial LTE networks, as well as 2G/3G network capacity expansion and modernisation projects of global mainstream carriers in the Asia Pacific, Eastern Europe, Africa and Latin America, by seizing opportunities presented by the global trend of wireless broadband network construction and network modernisation and reengineering. As a result, the Company market position and presence in the global wireless market has been fortified and optimised.

In connection with wireline products, the competitiveness of the Group's access network products continued to strengthen, with rapid sales growth reported in both the domestic and the overseas markets; Sales of carrying network products experienced a slight setback, reflecting declining domestic sales which more than offset the increase in international sales. We maintained our lead in access network products, notably xPON network construction, as various nations continued to roll on their broadband strategy. Meanwhile, our FTTX products were also making more significant revenue contributions. Regarding carrying network products, our customer base continued to optimise with large-scale sales achieved in emerging markets in the Asia Pacific, South America, the Middle East, India and Africa. Breakthroughs among global mainstream carriers were also being made.

Terminals

During the first half of 2011, the Group sustained rapid growth in the sales of its terminal products, reporting a 43.96% year-on-year growth in sales revenue.

During the reporting period, sales of the Group's terminal products (comprising 3G handsets in various modes and data cards) in the domestic market were gaining pace as the population of domestic 3G users continued to grow. Internationally, the Group sustained strong growth as its terminal products, including the 3G handsets, data cards and netbooks made breakthroughs among global mainstream carriers.

Telecommunication software systems, services and other products

Revenue from telecommunication software systems, services and other products grew by 42.29%, underpinned by stable growth in revenue from video, network terminals and wireless terminals as well as rapid growth for service products.

(II) MANAGEMENT DISCUSSION AND ANALYSIS PREPARED IN ACCORDANCE WITH PRC ASBES

The financial data below are extracted from the Group's unaudited financial statements prepared in accordance with PRC ASBES. The following discussion and analysis should be read in conjunction with the Group's financial statements and the accompanying notes thereto.

1. Overall operating results of the Group during the reporting period

Unit: RMB in thousands:

Of which: connected transactions involving sales of products or provision of labour services to the controlling shareholder and its subsidiaries by the Company during the reporting period amounted to RMB1,648,310.

* The above references to connected transactions relate to connected transactions as defined under the securities regulatory provisions of the Listing Rules of Shenzhen Stock Exchange.

Report of the Board of Directors

3. Breakdown of operating revenue for the reporting period by geographic region

Unit: RMB in thousands

Region	Operating revenue	Year-on-year Increase/decrease in operating revenue
The PRC	16,526,771	6.83%
Asia (excluding the PRC)	6,807,562	29.65%
Africa	5,011,605	12.27%
Europe, U.S. and Oceania	8,990,657	62.26%
Total	37,336,595	21.52%

4. Indicators for major products accounting for over 10% of the Group's operating revenue for the reporting period

Unit: RMB in thousands

By product	Operating revenue	Operating costs	Gross profit margin
Carriers' network	20,522,957	13,458,295	34.42%
Terminal	11,214,730	9,013,213	19.63%
Telecommunication software systems, services and other products	5,598,908	3,772,223	32.63%

5. Reasons for substantial change in the Company's principal business and its structure, breakdown of profit, profitability of principal business during the reporting period

- (1) There was no significant change in the principal business and its structure during the reporting period compared to the same period last year.
- (2) Changes in the breakdown of profit during the reporting period as compared to the same period last year are set out as follows:

Item	As a percentage of total profit for the six months ended 30 June 2011	As a percentage of total profit for the six months ended 30 June 2010	Change (percentage points)
Operating profit	53.72%	48.38%	5.34%
Expenses for the period	797.86%	652.39%	145.47%
Investment gains	91.56%	1.72%	89.84%
Non-operating income and expenses, net	46.28%	51.62%	(5.34%)

Note: The significant increase in expenses as a percentage of total profit for the reporting period was mainly attributable to the expansion in scale by the Company, increased investments in marketing and research and development, and the significant increase in investment gains as a percentage of total profit for the reporting period was mainly attributable to the investment gains derived from the disposal of equity interests in Nationz Technologies and the transfer of gains from fair-value change of certain derivative investments upon maturity to investment gains.

(3) There was no significant change in the profitability (gross profit margin) of principal business compared to the same period last year.

- 6. During the reporting period, the Company was not engaged in any other operating activities that had a significant impact on its net profit.**
- 7. Investment gains generated from an individual investee company accounting for more than 10% of the net profit of the Company during the reporting period**

Nationz Technologies, an investee of the Company engaged in the design of integrated circuits, reported a net profit of RMB58,919,600. Investment gains contributed and fair value gains/losses by Nationz Technologies to the Company for the period amounted to RMB905,872,000, representing 117.76% of the Company's net profit. For details, please refer to the section headed "(VIII) Investment in Securities" under the "V. Material Matters" in this report.

- 8. Difficulties encountered by the Group in its operations during the first half of 2011**

During the reporting period, global economic recovery continued at a slackened pace. Competition in the industry was intense, while there were increased conflicts in intellectual property rights.

- 9. Investments**

(1) Use of proceeds during the reporting period

The Company issued 40 million bonds cum warrants with a value of RMB4 billion ("Bonds cum Warrants") on 30 January 2008. The net proceeds of RMB3,961,443,520 raised from the issue of the Bonds cum Warrants after deduction of the underwriting commission, sponsorship fees and registration fees were deposited into the designated account of the Company opened with National Development Bank, Shenzhen Branch (account number: 44301560040310230000) on 5 February 2008. A capital verification report in respect thereof was issued by Shenzhen Nanfang-Minhe CPA Co., Ltd. on 5 February 2008.

As at 31 December 2009, the amount invested by the Company in projects utilising issue proceeds had met the agreed investment amount set out in issue prospectuses (RMB6,550.39 million) and the portion in excess had been funded by the Company's internal resources, the details of which have been set out in the 2009 Annual Report of the Company and the "Verification report on the Deposit and Application in 2009 of Issue Proceeds of ZTE Corporation" published on the same date.

The exercise period for the "ZXC1" Warrants ended on 12 February 2010 and a total of 23,348,590 "ZXC1" Warrants had been exercised generating total issue proceeds of RMB912 million. In order to enhance the efficiency of fund application and reduce finance costs, it was approved at the Thirtieth Meeting of the Fourth Session of the Board of Directors of the Company that the Company would replace internal funds that had previously been invested as partial funding for the issue proceed projects with proceeds from the exercise of the warrants. For details, please refer to the relevant announcement published by the Company on 24 March 2010.

Report of the Board of Directors

(2) Significant investments using funds other than issue proceeds

1. Establishment of the Group Finance Company

In order to strengthen the centralised treasury management of ZTE Group and enhance the efficiency of its fund application, it was approved at the Eleventh Meeting of the Fifth Session of the Board of Directors of the Company and the Third Extraordinary General Meeting for 2010 of the Company that the Company would establish ZTE Group Finance Co., Ltd. with a capital contribution of RMB1,000 million (including USD20 million).

On 9 February 2011, the China Banking Regulatory Commission (“CBRC”) issued Yin Jian Fu [2011] No. 41 Document “Approval Reply of CBRC Concerning the Establishment of A Group Finance Company by ZTE Corporation” (銀監覆[2011]41號文件《中國銀監會關於中興通訊股份有限公司籌建企業集團財務公司的批覆》), granting approval to the establishment of a group finance company by the Company. On 11 July 2011, CBRC issued the “Approval Reply of CBRC concerning the Commencement of Business of ZTE Group Finance Co., Ltd” (Yin Jian Fu [2011] No. 236) (《中國銀監會關於中興通訊集團財務有限公司開業的批覆》銀監覆[2011]236號), granting approval to the commencement of business of ZTE Group Finance Co., Ltd.

For details, please refer to the “Announcement of Resolutions of the Eleventh Meeting of the Fifth Session of the Board of Directors”, “Announcement of External Investment — the Establishment of ZTE Finance Co., Ltd”, “Announcement in respect of the Resolutions of the Third Extraordinary General Meeting of 2010”, “Announcement on Approval Received for the Establishment of a Group Finance Company” and “Announcement on the Approval of Business Commencement of ZTE Group Finance Co., Ltd.” dated 12 October 2010, 30 November 2010, 15 February 2011 and 13 July 2011, respectively.

2. Investment in a Research and development (“R&D”) base in Yuhuatai, Nanjing

To provide support for its future business development, the Company entered into an investment agreement with Nanjing Yuhuatai District People’s Government in respect of the proposed investment in and construction of the “ZTE (Nanjing) Area No. 3 R&D Base” project in Yuhuatai District, Nanjing. The investment was considered and passed at the Sixteenth Meeting of the Fifth Session of the Board of Directors of the Company and the 2010 Annual General Meeting of the Company. Total investment in the project is estimated at RMB16 billion (comprising investment in infrastructure of RMB6 billion). The construction period of the Project is expected to be 10 years. The Company will fund investments in the Project with its internal resources.

For details, please refer to the “Announcement of External Investment”, “Announcement of Resolutions of the Sixteenth Meeting of the Fifth Session of the Board of Directors” and “Announcement in respect of Resolutions of the 2010 General Meeting” of the Company dated 17 March 2011 and 17 May 2011, respectively.

10. Other matters

- (1) The Group did not make any profit forecast in respect of the operating results for the reporting period.
- (2) The Group did not disclose any business plans for 2011 in the 2010 Annual Report.

- (3) The consolidated gearing ratio of the Group for the first half of 2011 was 74.32%, increasing by 3.98 percentage points as compared to the end of last year mainly attributable to the combined effect of the increase in short-term loans to meet the Company's working capital requirements, the increase in amounts payable to suppliers in line with the expansion in business scale and the increase in dividend declared but not yet paid for the period. The interest-bearing debt ratio of the Group was 22.65%, which was 6.75 percentage points higher as compared to the end of last year mainly attributable to an increase in bank borrowings to satisfy the capital requirement of the Company.

(III) MANAGEMENT DISCUSSION AND ANALYSIS PREPARED IN ACCORDANCE WITH HKFRSS

The financial data below are extracted from the Group's unaudited financial statements prepared in accordance with HKFRSSs. The following discussion and analysis should be read in conjunction with the Group's financial statements and the accompanying notes as set out in this report.

Operating revenue

The following table sets out the revenue and the corresponding percentage of the total revenue attributable to the major product segments of the Group for the periods indicated:

Unit: RMB in millions

Product segment	For the six months ended 30 June 2011		For the six months ended 30 June 2010	
	Revenue	As a percentage of operating revenue	Revenue	As a percentage of operating revenue
Carriers' networks	20,523.0	55.0%	19,000.3	61.8%
Terminal	11,214.7	30.0%	7,790.3	25.4%
Telecommunication software systems, services and other products	5,598.9	15.0%	3,934.8	12.8%
Total	37,336.6	100.00%	30,725.4	100.00%

Report of the Board of Directors

The following table sets out the operating revenue of the Group and the corresponding percentage of the total operating revenue attributable to the PRC, Asia (excluding the PRC), Africa, Europe, America and Oceania for the periods indicated:

Unit: RMB in millions

Region	For the six months ended 30 June 2011		For the six months ended 30 June 2010	
	Revenue	As a percentage of operating revenue	Revenue	As a percentage of operating revenue
The PRC	16,526.8	44.3%	15,469.9	50.4%
Asia (excluding the PRC)	6,807.6	18.2%	5,250.7	17.1%
Africa	5,011.6	13.4%	4,464.0	14.5%
Europe, U.S. and Oceania	8,990.6	24.1%	5,540.8	18.0%
Total	37,336.6	100.0%	30,725.4	100.0%

The Group reported RMB37,336.6 million in operating revenue for the first half of 2011, representing a 21.5% growth compared to the same period last year. Operating revenue from domestic sales continued to grow, increasing by 6.83% to RMB16,526.8 million. Analysed by product segment, significant year-on-year revenue growth was reported in terminals and telecommunication software systems, services and other products, whilst year-on-year revenue of carriers' networks reported moderate growth, ensuring a significant increase in the total operating revenue of the Group for the six months ended 2011 over the same period last year.

The mild growth in operating revenue from the Group's carriers' networks segment was mainly attributable to the increase in revenue from international wireless, wireline and optical communication and data communication system products coupled with an increase in domestic wireless and wireline products, setoff by the decline in optical communication and data communication system products, in the domestic market which limited the growth of revenue from carriers' networks.

The increase in operating revenue from the Group's terminal product segment was driven mainly by the increase in sales revenue for GSM handsets, CDMA handsets, 3G handsets and data cards in both the international and domestic markets.

The significant increase in operating revenue from the Group's telecommunication software systems, services and other products was mainly driven by the growth in revenue of international video, network terminals, international and domestic service products and other products.

Cost of sales and gross profit

The following tables set out (1) the cost of sales of the Group and cost of sales as a percentage of total operating revenue and (2) the Group's gross profit and gross profit margin for the periods indicated:

Unit: RMB in millions

Cost of sales of the Group for the first half of 2011 increased by 30.4% as compared to same period last year to RMB27,224.2 million. The Group's overall gross profit margin for the first half of the year of 27.1% was 5.0 percentage points lower than the same period last year, mainly as a result of lower gross profit margin of carrier network and terminal products.

Cost of sales for the Group's carriers' networks for the first half of the year amounted to RMB14,348.7 million, 18.6% higher as compared to the same period last year. The gross profit margin for carriers' networks was 30.1% versus 36.3% for the same period last year. The decrease in the gross profit margin for carriers' networks was mainly due to a lower gross profit margin for international wireline switch and access systems as well as wireless communication systems.

Cost of sales for the Group's terminal products for the first half of the year amounted to RMB8,989.7 million, increasing by 48.8% compared to the same period last year. Gross profit margin for the Group's terminal segment was 19.8%, versus 22.5% for the same period last year, which was attributable mainly to lower gross profit margin for various domestic terminal products and a decreasing gross profit margin for international CDMA handsets, 3G handsets and data cards.

Report of the Board of Directors

Cost of sales for the Group's telecommunication software systems, services and other products for the first half of the year amounted to RMB3,885.8 million, increasing by 41.8% compared to the same period last year. The gross profit margin for telecommunication software systems, services and other products was 30.6%, compared to 30.4% for the same period last year, primarily resulting from higher gross profit margins in the domestic market but lower for the international market for video and network terminals, fixed terminals and service products.

Other income and gains

Other income and gains of the Group for the first half of 2011 amounted to RMB2,116.6 million, representing a 145.9% growth compared to RMB860.8 million for the first half of 2010, which was primarily attributable to the disposal of the equity interests in Nationz Technologies by the Company during the first half of 2011 and an increase in investment gains recognised as a result of the reclassification of outstanding unsold shares in Nationz Technologies from long-term equity investments to financial assets held for trading for accounting purposes.

Research and development costs

The Group's research and development costs for the first half of 2011 increased by 14.7% to RMB3,664.5 million from RMB3,195.3 million for the first half of 2010. The increase in research and development costs was attributable mainly to increased investments in the research and development of GSM/UMTS wireless systems, service products, core networks, etc. Our research and development costs fell 0.6 percentage point from 10.4% for the first half of 2010 to 9.8% as a percentage of operating revenue.

Selling and distribution costs

The Group's selling and distribution costs for the first half of 2011 increased by 22.6% to RMB4,983.6 million from RMB4,066.0 million for the first half of 2010, and increased by 0.1 percentage points from 13.2% to 13.3% as a percentage of operating revenue. The increase was attributable mainly to increased investments in the Company's overseas market development.

Administrative expenses

Administrative expenses of the Group for the first half of 2011 increased by 10.3% to RMB1,260.4 million, as compared to RMB1,142.6 million for the first half of 2010, and decreased by 0.3 percentage points from 3.7% to 3.4% as a percentage of operating revenue, mainly as a result of strengthened cost control by the Company.

Other expenses

Other expenses of the Group for the first half of 2011 amounted to RMB547.4 million, a slight increase as compared to RMB543.3 million for the first half of 2010.

Profit from operating activities

The Group's profit from operating activities for the first half of 2011 slightly increased by 0.5% to RMB1,773.0 million, as compared to RMB1,764.6 million for the first half of 2010. The operating profit margin of 4.7% was 1% lower than the same period last year, primarily due to a decline in gross profit margin in the Company's products.

Finance costs

Finance costs of the Group for the first half of 2011 amounted to RMB509.7 million, increasing by 29.4% from RMB393.9 million for the first half of 2010 mainly due to an increase in bank loan interest rate.

Tax

The Group's income tax expense for the first half of 2011 was RMB436.4 million, which was 9.2% higher as compared to RMB399.6 million for the first half of 2010, reflecting higher profit from certain subsidiaries of the Group that were subject to higher tax rates, which increased the effective tax to 34.3% for the first half of 2011 from 28.7% for the first half of 2010.

Profit attributable to minority interests

The Group's minority interests for the first half of 2011 amounted to RMB67.1 million, which was 42.1% lower as compared to RMB115.8 million for the first half of 2010. Minority interests decreased from 11.7% for the first half of 2010 to 8.0% for the first half of 2011 as a percentage of profit before minority interests, reflecting mainly lower profit at subsidiaries with a higher level of minority interests.

Other comprehensive income

Other comprehensive income of the Group for the first half of 2011 increased by 98.3% to RMB-2.3 million, compared to RMB-135.1 million for the first half of 2010. The change in other comprehensive income was mainly attributable to reduced losses arising from the translation of financial statements denominated in foreign currencies.

Debt-equity ratio and the basis of calculation

The debt-equity ratio of the Group for the first half of 2011 was 8.0 percentage points higher at 46.9% compared to 38.9% for the first half of 2010, which mainly reflected increased bank loans by the Company to fund working capitals.

Operating activities

The Group had a net cash outflow from operating activities of RMB6,220.5 million for the first half of 2011 compared to RMB4,910.4 million for the first half of 2010, reflecting year-on-year increase of cash outflow for purchases and the provision of services by RMB3,518.9 million mainly as a result of expanded sales, increase of cash outflow for payments made to employees by RMB1,056.1 million, decrease of tax payment by RMB444.0 million and increase of other cash paid in connection with operating activities by RMB918.9 million, coupled with a mild decrease of cash inflow for sales and the provision of services as compared with the same period last year and the increase of cash inflow from tax rebates by approximately RMB685.2 million.

Report of the Board of Directors

Investing activities

The net cash outflow from the Group's investment activities for the first half of 2011 was RMB2,183.2 million compared to a net cash outflow of RMB1,117.5 million for the first half of 2010, attributable mainly to cash paid for external investments by Shenzhen Zhonghe chunsheng No. 1 Equity Investment Fund Partnership Enterprise (深圳市中和春生壹號股權投資基金合伙企業) amounting to RMB716.5 million, which had been included in the Group's consolidated financial statements.

Financing activities

The Group's net cash inflow from financing activities for the first half of 2011 was RMB8,434.4 million, compared to RMB4,253.6 million for the first half of 2010, reflecting mainly cash proceeds of RMB8,427.7 million received from the Company's borrowings.

Disclosure required under the Hong Kong Stock Exchange Listing Rules

In accordance with paragraph 40 of Appendix 16 to the Hong Kong Stock Exchange Listing Rules, the Company confirms that, save as disclosed herein, there has been no material change in the current information regarding the Company from the information disclosed in the 2010 Annual Report of the Company in relation to those matters set out in paragraph 32 of Appendix 16.

(IV) BUSINESS OUTLOOK AND RISK EXPOSURE FOR THE SECOND HALF OF 2011

1. Business Outlook for the Second Half of 2011

Looking to the second half of 2011, the Company will be confronted with a complex market environment underpinned by opportunities as well as challenges. The rapid development of the mobile Internet will drive large-scale construction of the next-generation LTE mobile broadband network, and supplementary broadband construction is also expected to begin. In addition, the demand for better network quality will drive the construction of new 2G/3G networks and revamping of existing ones to modernised standards. As the nation continued to advance its broadband strategy, the wireline access market will embrace a new cycle of time window construction, while ICT industries such as the Internet of Things, cloud computing and mobile Internet, etc are on the brink of a new stage of transformation.

In the second half of 2011, domestic carriers are expected to speed up their capital expenditure; In the international market, mobile broadband construction and the development of smart terminals will remain some of the most sought after segments. The Company will seek to maintain a positive balance between scale and profit with the fundamental aim of sustaining stable growth in business scale. We will enhance our efforts in implementing our transformation into an operating business entity, strengthen control over expenses and strive to improve our operating efficiency.

2. Risk Exposure

(1) Interest rate risk

As the size of the Group's loan facilities continued to grow, the total amount of interest payments owed by the Group will vary in line with any fluctuations in the loan interest rates determined by the State and the profitability of the Group will be affected as a result.

(2) Foreign exchange risk

The foreign exchange risk of the Group arose mainly from exchange differences in the conversion to RMB (the functional currency of the Group) of sales and purchases settled in currencies other than RMB. With a strong emphasis on the research of exchange risk management policies, models and strategies, the Group has adopted natural hedging to manage its foreign exchange risks and facilitated the matching of its assets and liabilities denominated in foreign currencies through the choice of different currencies for various businesses and spot currency trading.

(3) Risk associated with intellectual property rights

The Group has always attached great importance to product technology research and development as well as the management of intellectual property rights. We maintain our investment in technology research and development each year at about 10% of our annual sales revenue. Our research and development team is currently supported by over 20,000 employees. While the Group has adopted stringent measures to protect its intellectual property rights, there can be no assurance that there will not be any conflicts in intellectual property rights between the Company and other telecommunications equipment manufacturers, franchisee companies and carriers which partner with the Group.

(4) Credit risk

The Group provides one-stop communications solutions to its customers. With the swift expansion of its business, the Group is serving a large customer base with differing credit status, and its business will inevitably be affected by the varied credit profiles of these customers.

(5) Country risk

Under the complicated global economic and financial environment, the Group will continue to be exposed to debtors' risks, trade protection, political risks or even warfare or the succession of political regimes in countries where the Group's projects are operated. As such, a very high level of operational and risk control capabilities is required.

(I) CORPORATE GOVERNANCE

1. The Company's corporate governance is in compliance with relevant requirements of the CSRC

The Company has been improving its corporate governance regimes and structures, regulating corporate operations and optimising internal control structures on an ongoing basis in accordance with the requirements of the Company Law, the Securities Law, Corporate Governance Standards for Listed Companies and relevant laws and regulations of the CSRC. During the reporting period, the general meeting, Board of Directors and Supervisory Committee were operated in compliance with the law, and the corporate governance of the Company was in compliance with provisions set out in the regulatory documents on corporate governance of listed companies issued by the CSRC.

In accordance with requirements of the “Notice on the Publication of the Supplementary Guidelines for Corporate Internal Control” (《關於印發企業內部控制配套指引通知》) issued by five ministries and commissions including the Ministry of Finance of the PRC and the CSRC and the “Notice on Procuring Work relating to Trial Internal Control Rules for Shenzhen Listed Companies” (《關於做好深圳轄區上市公司內部控制規範試點有關工作的通知》) and in order to ensure the smooth implementation of “Basic Rules for Corporate Internal Control” (《企業內部控制基本規範》) and “Corporate Internal Control Supplementary Guide” (《企業內部控制配套指引》) and to publish the self-assessment report on internal control, the Company formulated the “ZTE Internal Control Development Plan and Implementation Scheme 2011” at the beginning of 2011, which was considered and passed by the Eighth Meeting of the Audit Committee of the Fifth Session of the Board of Directors and the Sixteenth Meeting of the Fifth Session of the Board of Directors of the Company. For details, please refer to the “Report of the Board of Directors” of the 2010 Annual Report of the Company.

In accordance with the work arrangements of “ZTE Internal Control Development Plan and Implementation Scheme 2011”, the progress of implementation of the Company's internal control development during the first half of 2011 was as follows:

During the first quarter of 2011, an internal control project team structured in three tiers (the project steering committee, project management office and project task force) was set up with Company Chairman Mr. Hou Weigui acting as the convenor of the project steering committee. The project team confirmed the scope of implementation of internal control development in 2011. A project start-up meeting was held and team members received three days of specialised training in internal control. The start-up process for internal control development was completed to provide a solid foundation for subsequent work in process streamlining and self-inspection of internal control. For details of implementation during the first quarter, please refer to the in the “Report of the Board of Directors” of the 2011 first quarterly report of the Company.

Progress in the second quarter of 2011:

(1) Risk types streamlined and risk checklist formulated

In early April 2011, the project management office conducted detailed analysis of 18 application guidelines and streamlined 187 risk types in the guidelines with the formulation of a risk checklist, which was used to develop control activities corresponding to risks during process streamlining.

(2) *Mirroring between application guidelines and corporate system documents developed*

In the working draft of “Process Description” in internal control, the project team developed the mirroring relationship between corporate system documents and application guidelines by studying such corporate system documents and streamlining the corresponding descriptions of sub-processes in the application guideline. As at 30 June 2011, process descriptions corresponding to 18 application guidelines had been completed.

(3) *Responsible departments for control points confirmed*

The project team incorporated descriptions of control activities and confirmed responsible departments for various control points by communicating with departments relevant to the control activities. In the working draft of “risk control matrix” for internal control development, the project team streamlined relevant control points. As at 30 June 2011, “risk control matrix” corresponding to 18 application guidelines had been completed.

(4) *Internal control deficiency identification standards formulated*

The Audit Department and internal control project management office conducted numerous discussions on the identification standards for internal control deficiencies and completed a preliminary draft of internal control deficiency identification standards in late April 2011, which included quantitative standards and qualitative standards. We will continue to discuss and finalise the draft with the accountant firm responsible for internal control audit.

(5) *Self-inspection of internal control started*

Self-inspection of internal control was performed by extracting walk-through test information on the basis of descriptions of various business processes. The self-inspection results were recorded in the “risk control matrix” and a “detailed report of internal control deficiencies” was drawn up to record any internal control deficiencies identified. As at 30 June 2011, self-inspection of internal control had been completed in respect of all business processes, with the exception of certain sub-processes.

(6) *Plan for self-assessment on internal control confirmed*

The Audit Department of the Company set up an internal control self-assessment working team in mid-May 2011 and defined job responsibilities. The working team formulated an internal control self-assessment plan in late June 2011 and planned to complete system testing by 15 September 2011 and manual testing by 30 September 2011.

(7) *Analysis of differences in the progress of internal control development*

The Company planned to complete self-inspection on internal control during the period from April to June 2011. As certain business processes were optimised in June 2011, we needed to obtain supplementary information on walk-through tests in respect of those revised processes. As a result, there were certain sub-processes for which self-inspection on internal control had not completed as at 30 June 2011. Save for the above, the progress of other internal control work development in the second quarter of 2011 was consistent with the original work plan.

Material Matters

2. **The Group complied with all the principles and code provisions of the Code on Corporate Governance Practices set out in Appendix 14 to the Hong Kong Stock Exchange Listing Rules throughout the reporting period.**

3. **Securities Transactions by Directors**

The Directors of the Company confirmed that the Company had adopted the Model Code for Securities Transactions by Directors of Listed Issuers (the "Model code") as set out in Appendix 10 to the Hong Kong Stock Exchange Listing Rules. Having made due enquiries with all Directors and Supervisors of the Company, the Company was not aware of any information that reasonably suggested that the Directors and Supervisors had not complied with the requirements in the Model Code during the reporting period.

4. **The Audit Committee**

The Audit Committee of the Company has discussed with the management the accounting standards and practices adopted by the Group, and has also discussed and reviewed the report, including the financial statements of the Group for the six months ended 30 June 2011.

(II) IMPLEMENTATION OF THE 2010 PROFIT DISTRIBUTION PROPOSAL OF THE COMPANY

(VII) MATERIAL LITIGATION OR ARBITRATION OF THE GROUP INCURRED OR SUBSISTING DURING THE REPORTING PERIOD

During the reporting period, the Group did not incur any material litigation or arbitration. Progress during the reporting period of immaterial litigation and arbitration proceedings incurred prior to and other litigation and arbitration proceedings incurred during the reporting period under review are as follows:

1. An administrative penalty notice had been served upon Zhongxing Telecom Pakistan (Pvt) Ltd, a subsidiary of the Company (the "Pakistanis Subsidiary"), by the Rawalpindi Collectorate of Customs in respect of a claim of additional custom duties of approximately RMB23.9 million for the misdeclaration of the imported goods by the Pakistanis Subsidiary and a fine of approximately RMB324 million.

Following negotiations between the Group and the Rawalpindi Collectorate of Customs, the Rawalpindi Collectorate agreed in June 2007 that the fine might be exempted if the Pakistanis Subsidiary made a remedial tax payment of PKR177 million before 30 June 2007. Such payment had been made by the Pakistanis Subsidiary before 30 June 2007. Subsequently, the Rawalpindi Collectorate of Customs issued a notice to the Pakistanis Subsidiary demanding the payment of an addition tax amount of approximately PKR62 million (approximately RMB4,675,000). The Pakistanis Subsidiary appealed to the Customs Appellate Court against such demand.

On 15 March 2011, Customs Appellate Court of Islamabad ruled that the Pakistanis Subsidiary should not be required to pay the tax amount in dispute of PKR62 million (approximately RMB4,675,000). Currently the judgement has taken effect.

2. In August 2010, a U.S. company filed a lawsuit with a district court in California against the Company and its subsidiaries, claiming that the Company and its subsidiaries had infringed the claimant's copyright by downloading and using software developed by the claimant without permission and demanding the Company and its subsidiaries to stop such infringement and compensate the claimant's losses, although the amount of such compensation demanded was not specified in the claim by such U.S. company. The Company has appointed a U.S. law firm to represent it in the case and has filed a response to the court.

On 13 May 2011, the U.S. company applied to the Californian court for summary judgement in respect of the case. On 14 June 2011, the Californian court issued a summary judgement which ruled that the Company had violated provisions on applicable assessment periods contained in the software click license agreement between the Company and such U.S. company and had therefore breached the agreement.

On 5 August 2011, the U.S. company reached a settlement with the Company. The Company agreed to pay a total of USD9.75 million in settlement and licensing fees to the U.S. company over a period of three years, in consideration of the US company granting the Company the right to use all its commercial software in the next three years. On 5 August 2011, the court ruled to repeal the case in accordance with the law.

3. A lawsuit on breach of agreement and infringement was instituted against the Company and its subsidiary ZTE (USA), Inc. ("ZTE (USA)") at the district court of Dallas, Texas, the United States, alleging that the Company and ZTE (USA) had violated a confidential agreement between Universal Telephone Exchange, Inc. (UTE) and ZTE (USA), for which UTE was seeking a compensation of USD20 million in actual damages. UTE further claimed that it had lost a telecommunications project contract as a result of inappropriate actions of the Company and ZTE (USA), for which UTE was seeking a compensation of USD10 million in actual damages and USD20 million in punitive damages. Upon receipt of the writ of summons from the court, the Company's attorney filed a written response to the court generally denying UTE's charges against the Company and ZTE (USA). Meanwhile, the Company's attorney also disputed the jurisdiction of the said U.S. court over the Company. On 8 February 2011, UTE filed a Discovery Request in respect of the Company and ZTE (USA) in response to the dissent on jurisdiction raised by the Company, and the court gave permission to UTE to require the Company to comply with investigations relating to the issue of legal jurisdiction.

Upon due enquiries, it came to the knowledge of our attorney that UTE's business license in Texas was terminated on 21 May 2010. On this basis, our attorney disputed the Discovery Request filed by UTE and applied to the court for the lawsuit to be dismissed on the grounds that UTE's business license in Texas was terminated on 21 May 2010 and, therefore, according to Texan laws, UTE had no right to institute lawsuits in Texas or to require the Company to disclose any relevant information. The aforesaid legal documents were served on UTE on 21 March 2011. On 29 March 2011, UTE filed a written response to the dissent of ZTE (USA), pleading the court to reject ZTE (USA)'s dissent and to rule in favour of UTE's rights to institute relevant legal actions. The case is currently pending court trial.

The Company will publish timely announcements to disclose any substantial progress of the aforesaid arbitration and litigation.

4. On 7 April 2011, the Company published the "Announcement on Litigation" in relation to the lawsuit filed by Telefonaktiebolaget LM Ericsson (publ) ("Ericsson") against ZTE (UK) LIMITED ("ZTE (UK)"), a wholly-owned subsidiary of the Company, in respect of the alleged infringement on Ericsson's patent technologies by several handset models of ZTE (UK). A demand was made on ZTE (UK) to discontinue such act of infringement and compensate for Ericsson's losses, although no specific amount of compensation was raised by Ericsson in the statement of claim. The Company submitted a response on 20 June 2011 and the case is currently pending trial to be scheduled by the court.

On 1 April 2011, Ericsson applied to the Court of Rome for provisional injunction procedures against ZTE Italy S.r.l. ("ZTE Italy"), the subsidiary of ZTE in Italy, requesting the court to make a unilateral ruling. Such request was rejected by the court, which ordered Ericsson to serve a claim on ZTE Italy. ZTE Italy has submitted its defense to the court, requesting the court to reject the litigation claim of the claimant. As at the end of the reporting period, the ruling of the court had not been officially served upon the two parties.

On 14 April 2011 and 23 May 2011, Ericsson filed lawsuits against ZTE Deutschland GmbH ("ZTE Deutschland"), a wholly-owned subsidiary of the Company, with the district court of Dusseldorf and the district court of Mannheim in Germany, respectively, alleging infringement of Ericsson's patent technologies and demanding ZTE Deutschland to discontinue such act of infringement and compensate for Ericsson's losses. The local courts have initially estimated the amount in dispute in this case at EUR10.80 million and EUR2.275 million, respectively. ZTE Deutschland is currently preparing for its defense.

Based on the legal opinion furnished by the legal counsel engaged by the Company and the existing judgements and current progress of the case, it is difficult to ascertain the final outcome of this case at the present stage. The Directors are of the view that the aforesaid case will not have any material and adverse impact on the financial conditions and results of operation of the Group for the current period.

5. On 28 April 2011, the Company and ZTE France SASU (“ZTE France”), a wholly-owned subsidiary of the Company, received a statement of claim from the High Court of Paris, according to which a lawsuit has been filed by Huawei Technologies Co. Ltd. (“Huawei”), claiming that the data card products of the Company and ZTE France have infringed upon its patent and demanding the Company and ZTE France to discontinue such act of infringement and pay damages in the amount of EUR500,000. The first hearing of the case has been scheduled for 12 October 2011, and the Company is required to submit a brief defense by 10 October 2011. We are currently in active preparation for the defense. As the Company is no longer selling the products involved in this case, the litigation will not have any substantial impact on the local sales of the Company.

On 9 May 2011, ZTE Deutschland, a wholly-owned subsidiary of the Company, received a provisional injunction order against ZTE Deutschland in respect of “labelled data cards” awarded by the District Court of Hamburg, Germany based on an application by Huawei, which order had been forwarded to the Company by Huawei’s attorney. For details please refer to the “Announcement on Litigation” of the Company dated 12 May 2011. This provisional injunction order will not have any impact the current business of the Company. On 27 June 2011, ZTE Deutschland received a statement of claim served by the District Court of Hamburg, Germany, pursuant to which Huawei officially filed a lawsuit of trademark infringement in respect of “labelled data cards” with the court. Currently, ZTE Deutschland is preparing for its defense.

On 13 May 2011, Huawei filed a statement of claim with the court of Dusseldorf, Germany against ZTE Deutschland, a wholly-owned subsidiary of the Company, and the Company for infringement of its patent rights. The amount in dispute for this case was estimated by Huawei at EUR 1 million. ZTE Deutschland is currently preparing for its defense, which has been scheduled for 30 November 2011.

6. On 5 April 2011, a certain carrier of Ecuador filed an application for arbitration with the Business Arbitration Tribunal of Guayaquil, Ecuador, claiming quality problems existed in the works performed by the Company and demanding a total compensation amount of USD23.35 million from the Company, comprising USD22.25 million as reimbursement of the cost of network reconstruction and USD1.10 million as the cost for supervising and managing construction work quality of the entire network. The legal counsel engaged by the Company has submitted a defense in a timely manner to deny all allegations made by the carrier. Based on the legal opinion furnished by the legal counsel engaged by the Company, the Directors are of the view that the aforesaid case will not have any material and adverse impact on the financial conditions and results of operation of the Group for the current period.
7. On 29 July 2011, the Company and ZTE USA, the Company’s subsidiary in the United States, received a statement of claim filed by a certain U.S. company, simultaneously with the International Trade Commission (ITC) and the Federal District Court of Delaware, respectively, in the United States, alleging the Company and its US subsidiary of infringement upon its 3G patent rights. Defendants in this case included other companies. In the ITC case, This U.S. company demanded the issue of a permanent exclusion order and injunction that would prevent our terminal products from entering the United States. In the case filed with the District Court, damages for losses and payments of attorney fees were also demanded of the defendants, in addition to the plea for injunction, although no specific amount of compensation was named.

The Company will vigorously defend the case by adopting effective measures. Timely announcements will be made to report any substantial progress of the litigation.

2. Details in investment in securities

Nationz Technologies, the company with our equity investment, issued its shares under initial public offering which was listed on the GEM Board of the Shenzhen Stock Exchange on 30 April 2010. On 28 April 2011, Nationz Technologies announced that a period of 12 months had lapsed since its IPO listing. The 54,400,000 shares in Nationz Technologies held by the Company (after the implementation of the 2010 profit distribution and capitalisation of capital reserve plans of Nationz Technologies) would be available for listing and circulation as from 3 May 2011. Pursuant to the “Resolution on the Proposed Disposal of Shares in Nationz Technologies, Inc.” passed at the Nineteenth Meeting of the Fifth Session of the Board of Directors of the Company held on 17 May 2011, the disposal of shares in Nationz Technologies at an appropriate timing and a reasonable price range was approved.

From 24 May 2011 to 24 June 2011, the Company disposed of a total of 17,680,000 shares in Nationz Technologies. As at the end of the reporting period, the Company currently holds 36,720,000 shares in Nationz Technologies (accounting for 13.50% of the total share capital of Nationz Technologies), all of which are unrestricted circulating shares. As the Company no longer exercises significant influence over the operating activities of Nationz Technologies, the outstanding unsold shares, previously accounted for as long-term equity, have been reclassified as financial assets held for trading for accounting purposes.

For details, please refer to the relevant announcements published by the Company on 27 April, 17 May, 30 May, 14 June, 16 June and 23 June 2011, respectively.

(IX) EXECUTION OF SYNDICATE LOAN AGREEMENT

With a view to further optimising the long-term and short-term debt structure the Company and the subsidiaries included in its consolidated financial statements, minimising its exposure to assets and liabilities denominated in foreign currencies and meeting additional working capital requirements of the Company's medium/long-term development at appropriate finance costs, the Company proposes to seek medium/long-term debt financing with ZTE (H.K.), a wholly-owned subsidiary of the Company, as the principal.

On 8 July 2011, ZTE (H.K.) (as borrower) entered into a USD900 million syndicate loan agreement with 10 international banks including BOCHK (as mandated leading arranger). In view of the current financial conditions and credit rating of ZTE (H.K.), the Company will provide guarantee in relation to the aforesaid debt financing of ZTE (H.K.), in order to secure debt financing at favourable costs. The Company (as guarantor) entered into a guarantee agreement with BOCHK on 8 July 2011 to provide guarantee in favour of the loan syndicate to assure proper fulfillment of payments and all duties of ZTE (H.K.) under the syndicate loan agreement. In addition, to avoid interest rate risks associated with the aforesaid debt financing, ZTE (H.K.) proposed to carry out an interest rate swap with a nominal amount of not more than USD900 million at an appropriate timing. The aforesaid matters are approved by the Seventeenth Meeting of the Fifth Session of the Board of Directors and the 2010 Annual General Meeting of the Company. For details, please refer to the relevant announcements of the Company dated 8 April 2011, 17 May and 8 July 2011, respectively.

(X) DERIVATIVE INVESTMENTS

Risk analysis and control measures (including but not limited to market risks, liquidity risks, credit risks, operational risks and legal risks) in respect of derivative positions during the reporting period

Derivative investments conducted by the Company during the first half of 2011 included fixed income derivatives and value-protection derivatives. The major risks and control measures are discussed as follows:

1. Market risks: For fixed-income derivatives, gains were recognised at maturity. Gains or losses arising from the change in fair value as a result of differences in domestic and overseas forward quotations during the investment period are accounted for as variable gains or losses, which will not affect the ultimate gains of the derivatives. Gains or losses arising from the difference between the exchange rate for settlement of value-protection derivative investment contracts and the exchange rate prevailing on the maturity date will be accounted for as gains or losses on revaluation for each accounting period during the effective period of the value-protection derivative investments. Effective gains or losses shall be represented by the cumulative gains or losses on revaluation on the maturity date;
2. Liquidity risks: Fixed-income derivative investments are based on the foreign exchange payments for imports. The product did not effectively require the appropriation of available funds and therefore presented minimal liquidity risks. The value-protection derivatives investments of the Company were based on the Company's budget of foreign exchange income and expenditure and these investments matched the Company's actual foreign exchange income and expenditure to ensure sufficient fund for settlement on completion. Therefore, their effect on the Company's current assets was relatively small;
3. Credit risks: The counterparties of the derivative investment trades of the Company are banks with sound credit ratings and long-standing business relationships with the Company and therefore the transactions were basically free from performance risks;
4. Other risks: Failure of personnel in charge to operate derivative investments in accordance with stipulated procedures or fully understand information regarding derivatives may result in operational risks in actual operation; Obscure terms in the trade contract may result in legal risks;
5. Control measures: The Company addressed legal risks by entering into contracts with clear and precise terms with counterparty banks and strictly enforcing its risk management system. The Company has formulated the "Risk Control and Information Disclosure System relating to Investments in Derivatives" that contains specific provisions for the risk control, review procedures and subsequent management of derivative investments, so that derivative investments will be effectively regulated and risks relating to derivative investments will be duly controlled.

Material Matters

<p>Market prices or fair value change of invested derivatives during the reporting period, including the specific methods, assumptions and parameters adopted in the analysis of the fair values of the derivatives</p>	<p>The gains from investments in derivatives during the reporting period have been recognised by the Company. Total gains recognised for the reporting period amounted to RMB72.61 million, comprising exchange gains of RMB60.50 million, losses from fair-value change of RMB54.42 million and recognized investment gains of RMB66.53 million. The calculation of the fair value was based on forward exchange rates quoted by Reuters or the counterparty bank on a balance sheet date in line with the maturity date of the product.</p>
<p>Statement on whether the accounting policy and accounting audit principles for derivatives for the reporting period were significantly different from the previous reporting period</p>	<p>There was no significant change in the Company's accounting policy and accounting audit principles for derivatives for the reporting period as compared to that of the previous reporting period.</p>
<p>Specific opinion of Independent Directors, sponsors or financial advisors on the Company's derivative investments and risk control</p>	<p>Independent Directors' Opinion: The Company conducted fixed-income derivative investments based on due USD payables to offset exchange losses arising from the appreciation of RMB by obtaining low-risk fixed income. The Company conducted value protection derivative investments by using financial products to enhance its financial stability, so as to mitigate the impact of exchange-rate volatility on its assets, liabilities and profitability. The Company has conducted stringent internal assessment of its derivative investments made and has established corresponding regulatory mechanisms with dedicated staff. The counterparties with which the Company and its subsidiaries enter into contracts for derivative investments are organisations with sound operations and good credit standing. We are of the view that the derivative investments made by the Company and its subsidiaries are closely related to their day-to-day operational requirements and in compliance with relevant laws and regulations.</p>

- Note 1: Guarantee provided by ZTE H.K., a wholly-owned subsidiary of the Company, in the form of a standby letter of credit backed by its bank credit facility, while the bank credit facility of ZTE H.K. is guaranteed by the Company. In effect of the aforesaid two guarantees, ZTE is the ultimate guarantor and Benin Telecoms is the ultimate party being guaranteed, for an amount of USD3 million. As the gearing ratio of Benin Telecoms was in excess of 70%, the aforesaid guarantee was subject to consideration and approval by the Board of Directors and the general meeting of the Company in accordance with requirements of relevant laws and regulations. These two guarantees have been treated as the same guarantee in the calculation of the sum of the total amount of guarantee approved as at the end of the reporting period and the total balance of actually incurred as at the end the reporting period.
- Note 2: The Company provided a guarantee in respect of a bank loan extended to subsidiary Congo-Chine Telecom S.A.R.L. by pledging its 51% equity interests in Congo-Chine Telecom S.A.R.L. As the gearing ratio of Congo-Chine exceeded 70%, the said guarantee was subject to consideration and approval by the Board of Directors and the general meeting of the Company in accordance with requirements of relevant laws and regulations.
- Note 3: It was respectively approved at the Twenty-fourth and Twenty-fifth Meetings of the Fourth Session of the Board of Directors that the 51% equity interests in Closed Joint-Stock Company CJSC TK Mobile ("CJSC TK Mobile") held by the Company be applied as a security against a bank loan extended to CJSC TK Mobile; a performance guarantee of US\$40 million be provided by the Company for PT. ZTE Indonesia ("ZTE Indonesia"), a wholly-owned subsidiary and application be made by the Company to the relevant bank for the issuance of a letter of performance guarantee with an amount of US\$5 million. Since the gearing ratio of both CJSC TK Mobile and ZTE Indonesia was above 70%, the aforesaid guarantees were approved at the first extraordinary general meeting of 2009. As at the date of this report, a US\$5 million guarantee for ZTE Indonesia provided by way of standby letter of credit backed by the Company's banking credit facilities has been executed and the US\$40 million performance guarantee agreement has been signed. The guarantee provided in respect of CJSC TK Mobile's bank loans by way of pledge of equity has not yet been performed as the relevant agreement has not yet been signed.
- Note 4: It was approved at the Thirty-first Meeting of the Fourth Session of the Board of Directors that a performance guarantee of not more than US\$30 million be provided by the Company for ZTE Telecom India Private Limited ("ZTE India"), a wholly-owned subsidiary million and application be made by the Indian local bank to the Indian local bank for the issuance of an assurance letter in respect of contract performance to provide guarantee with an amount not exceeding US\$3 million for ZTE India. Since the gearing ratio of ZTE India was above 70%, the aforesaid guarantees were approved at the second extraordinary general meeting of 2009 in accordance with relevant laws and regulations. As at the date of this report, an agreement in respect of the US\$30 million performance guarantee provided by the Company has been signed and INR6,848,100 out of the US\$3 million guarantee provided to ZTE India by way of bank assurance letter has been drawn upon.
- Note 5: On 8 July 2011, ZTE (H.K.), a wholly-owned subsidiary of the Company, entered into a USD900 million syndicate loan agreement with 10 international banks including Bank of China (Hong Kong) Limited ("BOCHK"). On 8 July 2011, the Company entered into a guarantee agreement with BOCHK to provide guarantee by way of joint liability assurance for an amount of not more than USD900 million in respect of the syndicate loan for ZTE (H.K.). The period of guarantee shall commence on the date on which the guarantee becomes effective and ends on the date which is 60 months after the date of the syndicate loan agreement. The aforesaid guarantee was considered and passed at the Seventeenth Meeting of the Fifth Session of the Board of Directors held on 8 April 2011. As the gearing ratio of ZTE (H.K.) is above 70%, the aforesaid guarantee was submitted to the 2010 Annual General Meeting of the Company held on 17 May 2011 and was considered and approved.
- Note 6: Guaranteed amounts denominated in Indian Rupee (INR) are translated at the exchange rate of 1 Indian Rupee to RMB0.1440 (being the book exchange rate of the Company on 30 June 2011). Guaranteed amounts denominated in US dollars are translated at the exchange rate of USD1 to RMB6.4716 (being the book exchange of the Company on 30 June 2011).
- Note 7: All third party guarantees of the Company shall be submitted to the Board of Directors for its review and shall require the approval of two-thirds of the members of the Board in order to be effective. If such third party guarantees are otherwise subject to review and approval at the general meeting, then they shall be tabled at the general meeting following approval by the Board of Directors in order to be effective.

II. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES

1. Basis of preparation

These financial statements have been prepared in accordance with the "Enterprise Accounting Standards — Basic Standards" and 38 specific accounting standards, subsequent practice notes, interpretations and other relevant regulations (collectively "ASBEs") promulgated by the Ministry of Finance in February 2006.

The financial statements are prepared on a going concern basis.

The Group's accounts have been prepared on an accrual basis. All items are recorded by using historical cost as the basis of measurement except for some financial instruments. Impairment provision is made according to relevant regulation if the assets are impaired.

2. Statement of compliance

The financial statements truly and completely reflect the financial position of the Group and the Company as at 30 June 2011 and the results of their operations and their cash flows for the first half year of 2011.

3. Financial year

The financial year of the Group is from 1 January to 31 December of each calendar year.

4. Reporting currency

Reporting currency and the currency used in preparing the financial statements were Renminbi. The amounts in the financial statements were denominated in thousand of Renminbi, unless otherwise stated.

The Group's subsidiaries, jointly-controlled entities and associates determine their reporting currency according to the major economic environment in which they operate the business, and translate into Renminbi when preparing the financial statements.

5. Business combination

Business combination represents transaction which combines two or more separate businesses into one reporting entity. Business combinations are classified into business combinations involving entities under common control and business combinations not involving entities under common control.

Business combinations involving entities under common control

A business combination involving entities under common control is a business combination in which all of the combining entities are ultimately controlled by the same party or parties both before and after the business combination, and that control is not transitory. The combining party is the entity that obtains control of the other entities participating in the combination at the combination date, and the other entities participating in the combination are the parties being combined. The combination date is the date on which the combining party effectively obtains control of the parties being combined.

Assets and liabilities obtained by combining party in the business combination are recognized at their carrying amounts at the combination date as recorded by the party being combined. The difference between the carrying amount of the consideration paid for the combination (or aggregate face values of the shares issued) and the carrying amount of the net assets obtained is adjusted to capital reserves. If the capital reserve is not sufficient to absorb the difference, any excess is adjusted to retained profits.

Business combinations not involving entities under common control

A business combination not involving entities under common control is a business combination in which all of the combining entities are not ultimately controlled by the same party or parties both before and after the business combination. The acquirer is the entity that obtains control of the other entities participating in the combination at the acquisition date, and the other entities participating in the combination are the acquirees. The acquisition date is the date on which the acquirer effectively obtains control of the acquiree.

The acquiree's identifiable assets, liabilities and contingent liabilities are recognized at their fair values at the acquisition date.

The excess of the sum of the consideration paid (or equities issued) for business combination and equity interests in the acquiree held prior to the date of acquisition over the share of the attributable net identifiable assets of the acquiree, measured at fair value, was recognized as goodwill, which is subsequently measured at cost less cumulative impairment loss. In case the fair value of the sum of the consideration paid (or equities issued) and equity interests in the acquiree held prior to the date of acquisition is less than the fair value of the share of the attributable net identifiable assets of the acquiree, a review of the measurement of the fair values of the identifiable assets, liabilities and contingent liabilities, the consideration paid for the combination (or equity issued) and the equity interests in the acquiree held prior to the date of acquisition is conducted. If the review indicates that the fair value of the sum of the consideration paid (or equities issued) and equity interests in the acquiree held prior to the date of acquisition is indeed less than the fair value of the share of the attributable net identifiable assets of the acquiree, the difference is recognized in current profit or loss.

II. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

6. Consolidated financial statements

The consolidation scope for consolidated financial statement is determined based on the concept of control, including the Company and all subsidiaries' financial statements as at 30 June 2011. Subsidiaries are those enterprises or entities which the Company has control over.

The financial statements of the subsidiaries are prepared for the same reporting period as the Company, using consistent accounting policies. All balances, transactions and unrealized profit and loss arising from intercompany transactions, and dividends are eliminated on consolidation.

The excess of current loss attributable to minority shareholders of a subsidiary over their entitlements to the opening balance of shareholders' equity shall be charged to minority interests. A change in minority interests without loss of control is accounted for as an equity transaction.

For subsidiaries obtained through a business combination not involving entities under common control, the operating results and cash flows of the acquirees will be recognized in consolidated financial statements from the date the Group effectively obtains the control until the date that control is terminated. When consolidated financial statement is prepared, the subsidiaries' financial statements will be adjusted based on the fair values of the identifiable assets, liabilities and contingent liabilities at the acquisition date.

For subsidiaries obtained through a business combination involving entities under common control, the operating result and cash flow of the party being combined will be recognized in consolidated financial statement from the beginning of the period during which the combination occurs. In preparing the comparative consolidated financial statements, adjustments were made to relevant items in financial statements in previous periods as if the reporting entity formed after the consolidation had been in existence since the ultimate controlling party started to exercise effective control.

7. Cash and cash equivalents

Cash comprises cash on hand and deposits readily available for payments. Cash equivalents represent short-term highly liquid investments which are readily convertible to known amounts of cash, and subject to an insignificant risk of changes in value.

8. Foreign currency translation

For foreign currency transactions, the Group translates the foreign currency into its functional currency.

II. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

8. Foreign currency translation (continued)

Upon initial recognition, foreign currency transactions are translated into the functional currency using the average exchange rate for the period when transactions occur. At the balance sheet date, foreign currency monetary items are translated using the spot exchange rate at the balance sheet date. The exchange differences arising from the above translation, except those relating to foreign currency borrowings for the acquisition, construction or production of assets eligible for the capitalization shall be dealt with according to the principle of capitalization of borrowing costs, are recognized in profit or loss. Also at the balance sheet date, foreign currency non-monetary items measured at historical cost continue to be translated using the spot exchange rate at the dates of the transactions and it does not change its carrying amount in functional currency. Foreign currency non-monetary items measured at fair value are translated using the spot exchange rate. The exchange differences arising from the above translations are recognized in current profit or loss or other comprehensive income.

The Group translates the functional currencies of foreign operations into Renminbi when preparing the financial statements. Asset and liability items in the balance sheet are translated at the spot exchange rate prevailing at the balance sheet date. Shareholders' equity items, except for retained profits, are translated at the spot exchange rates at the date when such items arose. Income and expense items in the income statement are translated using the average exchange rate for the periods when transactions occur. Translation differences arising from the above translation are presented as a separate line item under shareholders' equity in the balance sheet. When foreign operations are disposed, other comprehensive income relating to the foreign operation is transferred to current profit or loss. Partial disposal shall be recognized on a pro-rata basis.

Cash flows denominated in foreign currencies and foreign subsidiaries' cash flows are translated using the average exchange rate for the period when cash flows occur. The impact on cash by the fluctuation of exchange rates is presented as a separate line item of reconciliation in the cash flow statement.

9. Financial instruments

Financial instruments refer to the contracts which give rise to a financial asset in one entity and a financial liability or equity instrument in another entity.

Recognition and derecognition of financial instruments

The Group recognizes a financial asset or a financial liability when it becomes a party to the contractual provisions of the financial instrument.

A financial asset (or part of it, or a part of a group of similar financial asset) is derecognized when one of the following criteria is met:

- (1) The right of receiving the cash flow generated from the financial asset has expired;
- (2) The right of receiving cash flow generated by the financial assets is transferred, or an obligation of paying the full amount of cash flow received to third parties in a timely manner has been undertaken under "pass-through" agreements, where (a) substantially all risks and rewards of the ownership of such financial assets have been transferred, or (b) control over such financial assets has not been retained even though substantially all risks and rewards of the ownership of such financial assets have been neither transferred nor retained.

II. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

9. Financial instruments (continued)

Recognition and derecognition of financial instruments (continued)

If the obligation of financial liability has been fulfilled, cancelled or expired, the financial liability is derecognized. If the present financial liability is substituted by the same debtor with another liability differing in substance, or the terms of the present liability have been substantially modified, this substitution or modification is treated as derecognition of a present liability and recognition of a new liability with any arising differences recognized in profit or loss.

Conventional dealings in financial assets are recognised or derecognised under the trade day accounting method. Conventional dealings refer to the receipt or delivery of financial assets within periods stipulated by the law and according to usual practices. The trade day is the date on which the Group undertakes to buy or sell a financial asset.

Classification and valuation of financial assets

The Group classifies its financial assets into four categories at initial recognition: financial assets at fair value through profit or loss, held-to-maturity investments, loans and receivables, and available-for-sale financial assets. Financial assets are initially recognized at fair value. For financial assets at fair value through profit or loss, the relevant transaction costs are directly recognized in profit or loss; for other financial assets, the relevant transaction costs are recognized in their initial recognition amount.

The subsequent measurement of financial assets is dependent on its classification:

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss comprise derivative financial assets and those designated at fair value through profit or loss at inception. Financial assets are classified as derivative if they satisfy one of the following conditions: they are acquired or incurred principally for the purpose of selling or repurchasing in the near term; they are part of a portfolio of identified financial instruments that are managed together, and for which there is objective evidence of a recent pattern of short-term profit taking; they are derivative financial instruments, with the exception of derivatives designated as valid arbitrage, derivatives under financial guarantee contracts and derivatives linked to and settled by way of delivery of equity investments not quoted in an active market and whose fair value cannot be reliably measured. These financial assets are subsequently measured at fair value, and gain or loss from changes in fair value and derecognition are recognized in current period's profit or loss. Dividends or interest income derived from financial assets at fair value through profit or loss are also recognized in current profit or loss.

9. Financial instruments (continued)

Classification and valuation of financial assets (continued)

Held-to-maturity investments

Held-to-maturity investments are non-derivative financial assets whose maturity and redemption amount are fixed or ascertained and in respect of which the Group has clear intentions and ability to hold until maturity. Such financial assets are subsequently measured using the effective interest method on the basis of amortised cost. Gains or losses arising from derecognition, impairment or amortization are recognised in the current profit or loss.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are subsequently carried at amortized cost using the effective interest method less any allowance for impairment. Amortized cost is calculated taking into account any discount or premium on acquisition and includes fees that are an integral part of the effective interest rate and transaction costs. Gains and losses are recognized in the income statement when the loans and receivables are derecognized or impaired, as well as through the amortization process.

Available-for-sale financial assets

Available-for-sale financial assets are non-derivative financial assets that are designated as available-for-sale or those financial assets that are not classified in any of the above categories. Subsequent to initial recognition, these financial assets are measured at fair value. Gains and losses arising from fair value changes in available-for-sale financial assets, except for impairment losses and foreign currency monetary items' translation differences which are recognized in profit or loss, are recognized as other comprehensive income in capital reserves until the financial assets are derecognized or impaired upon which the cumulative gains or losses are transferred out from capital reserves to profit or loss. Dividends or interest income derived from available-for-sale financial assets is recognized in profit or loss.

Equity investments that are not quoted in an active market and whose fair value cannot be reliably measured are carried at cost.

II. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

9. Financial instruments (continued)

Classification and valuation of financial liabilities

The Group classifies its financial liabilities at initial recognition: financial liabilities at fair value through profit or loss and other financial liabilities. For financial liabilities at fair value through profit or loss, the relevant transaction costs are directly recognized in profit or loss; for other financial liabilities, the relevant transaction costs are recognized in their initial recognition amount.

The subsequent measurement of financial assets is dependent on its classification:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss comprise derivative financial liabilities and those designated at fair value through profit or loss at inception. Financial liabilities are classified as derivative if they satisfy one of the following conditions: they are acquired or incurred principally for the purpose of selling or repurchasing in the near term; they are part of a portfolio of identified financial instruments that are managed together, and for which there is objective evidence of a recent pattern of short-term profit taking; they are derivative financial instruments, with the exception of derivatives designated as valid arbitrage, derivatives under financial guarantee contracts and derivatives linked to and settled by way of delivery of equity investments not quoted in an active market and whose fair value cannot be reliably measured. These financial liabilities are subsequently measured at fair value, and all realized or unrealised gain or loss are recognized in current period's profit or loss.

Other financial liabilities

Subsequent to initial recognition, these financial assets are carried at amortized cost using the effective interest method.

Financial guarantee contracts

A financial guarantee contract is a contract under which the guarantor and the creditor agree that the guarantor shall assume the debts or liability in the event of default of the debtor. Financial guarantee contracts are initially recognized as liability at fair value. Financial guarantee contracts not classified as financial liabilities designated at fair value through profit or loss, after initial recognition, are subsequently measured at the higher of: (i) the amount of the best estimates of the expenditure required to settle the present obligations at the balance sheet date; and (ii) the initial amount less accumulated amortization.

II. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

9. Financial instruments (continued)

Derivative financial instruments

The Group uses derivative financial instruments such as forward currency contracts to hedge its risks associated with foreign currency fluctuations. Such derivative financial instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative. Derivatives linked to and settled by way of delivery of equity investments not quoted in an active market and whose fair value cannot be reliably measured that are not quoted in an active market and whose fair value cannot be reliably measured are carried at cost.

Any gains or losses arising from the change in fair value on derivatives are taken directly to the income statement, except for those falling under cash flow hedging, which shall be recognized in other comprehensive income.

Bonds cum warrants

Upon issuance, the Group determines in accordance with the terms of the Bonds cum Warrants whether such Bonds cum Warrants consist of both equity and liability components. For Bonds cum Warrants that carry both equity and liability components, liability and equity are separately dealt with upon initial recognition. During the segregation, the fair value of the liability is first determined and recognized. Then the initial recognition of the equity component is determined by deducting the initial liability recognition amount from the overall issue price of the Bonds cum Warrants. Transaction costs are apportioned between liability and equity components according to their respective fair values. The liability component is presented as liability and subsequently measured on an amortised cost basis, until it is cancelled, converted or redeemed. The equity component is presented as equity and not remeasured in subsequent years.

The fair value of financial instruments

If there is an active market for a financial asset or financial liability, the Group uses quoted prices in the active market to establish its fair value. For financial instruments without active market, the fair value is established by using valuation techniques. Valuation techniques include reference to most recent market prices used by knowledgeable and willing parties, reference to current fair value of other financial instrument with similar nature, discounted cash flow method and option valuation models.

Impairment of financial assets

The Group assesses the carrying amount of financial assets at the balance sheet date. If there is any objective evidence that a financial asset is impaired, the Group provides for such impairment losses. The objective evidence, which indicates impairment of financial assets, represents events actually occurring after initial recognition of financial assets, having an impact on financial assets' estimated future cash flows, and such impact can be reliably measured.

Notes to Financial Statements

Currency: RMB'000
(English translation for reference only)

II. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

9. Financial instruments (continued)

Impairment of financial assets (continued)

Assets carried at amortised cost

If there is objective evidence that an impairment loss on such financial assets has been incurred, the financial asset's carrying amount is reduced to the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (namely the effective interest rate determined at initial recognition), taking into account the value of relevant collaterals. If floating interest rates are used, the current effective interest rate stipulated in the contract shall be adopted as the discount rate in calculating the present value of the future cash flows.

For a financial asset that is individually significant, the Group assesses the asset individually for impairment if there is objective evidence of impairment, and recognizes the amount of impairment in profit or loss. For a financial asset that is not individually significant, the Group include the asset in a group of financial assets with similar credit risk characteristics and collectively assess them for impairment. If it is determined that no objective evidence of impairment exists for an individually assessed financial asset, whether the financial asset is individually significant or not, the financial asset is included in a group of financial assets with similar credit risk characteristics and collectively assessed for impairment. Financial assets, for which an impairment loss is individually recognized, are not included in the collective assessment for impairment.

After the Group recognizes impairment loss of financial assets carried at amortized cost, if there is objective evidence that the financial assets' value recovered and the recovery is objectively related to an event occurring after the impairment is recognized, the previously recognized impairment loss shall be reversed and recognized in profit or loss. However the reversal shall not result in a carrying amount of the financial asset that exceeds what the amortized cost would have been had the impairment not been recognized at the date when the impairment is reversed.

Available-for-sale financial assets

If an available-for-sale financial asset is impaired, the cumulative loss arising from decline in fair value that had been recognized directly in capital reserves is removed from capital reserves and recognized in profit or loss. The cumulative loss that is removed from capital reserves is the difference between its acquisition cost (net of any principal repayment and amortization) and its current fair value, less any impairment loss previously recognized in profit or loss.

If after an impairment loss has been recognized on an available-for-sale debt instrument, the fair value of the debt instrument increases in a subsequent period whereby the increase can be objectively related to an event occurring after the impairment losses were recognized, the impairment loss is reversed which is recognized in profit or loss. Impairment losses recognized for equity instruments classified as available-for-sale are not reversed through profit or loss. Fair value gains that arise after the impairment are directly recognized in other comprehensive income.

II. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

9. Financial instruments (continued)

Impairment of financial assets (continued)

Assets carried at cost

If financial assets carried at cost are impaired, the impairment loss are recognized in profit or loss and measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses shall not be reversed.

For long term equity investments measured using the cost method regulated in “ASBE No. 2 — Longterm equity investments” which have no quotation in an active market and whose fair value cannot be reliably measured, their impairment is also calculated in accordance with the aforementioned principle.

Derecognition of financial assets

If the Group has transferred substantially all the risks and rewards associated with the ownership of a financial asset to the transferee, the asset should be derecognized. If the Group retains substantially all the risks and rewards of ownership of a financial asset, the asset should not be derecognized.

When the Group has neither transferred nor retained substantially all the risks and rewards of ownership of the financial asset, it may either derecognize the financial asset and recognize any associated assets and liabilities if control of the financial asset has not been retained; or recognizes the financial asset to the extent of its continuing involvement in the transferred financial asset and recognizes an associated liability if control has been retained.

10. Accounts Receivable

(1) Individually significant accounts receivable for which separate bad-debt provision is made

The Group conducts impairment tests in respect of its significant account receivables and makes provision for impairment when there is objective evidence of impairment. Objective evidence for impairment includes: (1) significant financial difficulties experienced by the debtor; (2) default on or non-payment of due interest or principal payments; (3) concessions made to the insolvent debtor by creditors owing to economic or legal considerations; (4) probable bankruptcy or other financial reorganisation of the debtor; (5) inability to recover the debt after repayments from the bankruptcy assets or the estate upon the bankruptcy or death of the debtor.

An account receivable is considered individually significant if it amounts to 0.1% of the total original value of all accounts receivable in aggregate.

II. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

10. Accounts Receivable (continued)

(2) *Accounts receivable for which collect bad debt provision is made*

Individually insignificant accounts, for which there is no objective evidence under individual impairment tests warranting individual provision, are divided into different asset groups based on their credit risk characteristics, and each group is assessed in accordance with different policies to determine their impairment provision. The management divides trade receivables (other than those in respect of which individual asset impairment provision has been made) into the following asset groups as follows on the basis of credit risk rating and historical repayment records:

	Percentage of provision(%)
0-6 months	—
7-12 months	0-15
13-18 months	5-60
19-24 months	15-85
2-3 years	50-100
over 3 years	100

11. Inventories

Inventories include raw materials, materials sub-contracted for processing, work-in-progress, finished goods, materials for construction-in-progress and product deliveries.

Inventories are initially recorded at costs. Inventories' costs include purchasing costs, processing costs and other costs. Actual costs of goods delivered are recognized using the weighted moving average method. Materials for construction-in-progress include low-value consumables and packaging materials, which are amortised using the separate amortization method/one-off write-off method.

Inventories are valued using the perpetual inventories system.

Inventories at the end of the year are stated at the lower of cost or net realizable value. Provision for impairment of inventories is made and recognized as expenses when the net realizable value is lower than cost. If the factors that give rise to the provision in prior years are not in effect in current year, as a result that the net realizable value of the inventories is higher than cost, provision should be reversed within the impaired cost, and recognized in profit or loss.

Net realizable values represent estimated selling prices less any estimated costs to be incurred to completion, estimated selling expenses and relevant tax amounts. Provision for impairment of inventories is made on the basis of individual categories.

II. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

12. Long-term equity investments

Long-term equity investments include equity investments in subsidiaries, joint ventures and associates, as well as equity investments in investees over the Company does not exercise control, common control or significant influence which are not quoted in an active market and the fair value of which cannot be reliably measured.

Long-term equity investments were recorded at initial investment cost on acquisition. The initial investment cost of long-term equity investments derived from business combination through the merger of companies under the common control is measured as the share of the carrying value of the owner's equity of the acquiree. The initial investment cost of long-term equity investments derived from business combination through the merger of companies not under the common control is measured at the acquisition costs (The initial investment cost of the merger of companies not under the common control through multiple transactions in different stages is measured at the sum of the carrying value of equity investments in the acquiree held prior to the date of acquisition and the cost of additional investment on the date of acquisition). Acquisition costs represent the sum of the fair values of assets paid, liabilities incurred or assumed and equity instruments issued by the acquirer. The initial investment cost of long-term equity investments acquired other than through business combination is determined in the following manner: where the acquisition is made by cash payment, the initial investment cost is measured at the actual cash payment plus expenses directly related to the acquisition of the long-term investment, tax and other necessary expenses. Where equity securities are issued as consideration, the initial investment cost is measured at the fair value of the equity securities. Where the acquisition is funded by investors, the initial investment cost is measured at the value stipulated in the investment contract or agreement, unless the value so agreed is deemed unfair.

The cost method is used when the Group does not jointly control or has significant influence over the investee, and the long term equity investments are not quoted in active markets, and have no reliably measurable fair values. In the financial statements of the Company, the cost method is used for longterm equity investments in investees over which the Company exercises control. Control is defined as the power to determine the financial and operational policies of a corporation so as to derive gains from the operations of such corporation.

When the cost method is used, long-term equity investments are measured at initial cost on acquisition. Other than prices actually paid upon the acquisition or cash dividends or profit included in the consideration which have been declared but not yet paid, cash dividends or profit declared by the invested enterprise are recognized as investment income for the current period. Impairment of longterm investments is considered in accordance with relevant asset impairment policies.

The equity method is used to account for long-term equity investments when the Group can jointly control or has significant influence over the invested entity. Joint control means sharing control over certain economic activities pursuant to contractual agreements and exists only if significant financial and operational decisions relating to such economic activities require unanimous approval of investing parties sharing such control. Significant influence means having the authority to take part in the decision over the financial and operational policies but not the authority to control or jointly control with other parties the formulation of such policies.

II. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

12. Long-term equity investments (continued)

Under the equity method, any excess of the initial investment cost over the Company's share of the net fair value of the investment's identifiable assets and liabilities is included in the initial investment cost of the long-term equity investment. Any excess of the Company's share of the investment's identifiable assets and liabilities over the cost of investment is excluded from the carrying amount of the investment and recognized in profit and loss for the current period, and the cost of long-term equity investment is adjusted accordingly.

Under the equity method, after the long-term equity investments are acquired, investment gains or losses are recognized and the carrying amount of the long-term equity investment is adjusted to reflect the Group's share of the investee's net profit or loss. When recognizing the Group's share of the net profit or loss of the invested entity, the Group makes adjustments based on fair values of the investees' identifiable assets and liabilities at the acquisition date and in accordance with the Group's accounting policy and accounting period to investee's net profits which also eliminates profit or loss from intertransactions with associates and joint ventures attributed to investor which is calculated pro rata on the basis of share percentage (for loss from inter-transactions belonging to impairment loss, it shall be wholly recognized). When the invested enterprise declares profit appropriations or cash dividends, the carrying amount of investment is adjusted down by the Group's share of the profit appropriations and dividends. The Group shall discontinue recognizing its share of the losses of the investee after the long-term equity investment together with any long-term interests that in substance forms part of the Group's net investment in the investee are reduced to zero, except to the extent that the Group has incurred obligations to assume additional losses. The Group also adjusts the carrying amount of long-term equity investments for other changes in owner's equity of the investees (other than net profits or losses), and includes the corresponding adjustment in equity.

On disposal of the long-term equity investments, the difference between book value and market price is recognized in profit or loss for the current period. Long-term equity investments accounted for under the equity method and recognised in the shareholders' equity shall be transferred to profit or loss for the current period on a proportionate basis upon disposal.

For details of impairment test methods and impairment provision methods for long-term equity investments in subsidiaries, jointly-controlled entities and associates, please refer to Note II.23. For details of impairment test methods and impairment provision methods for other long-term equity investments not quoted in an active market and whose fair value cannot be reliably measured, please refer to Note II.9.

II. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

13. Fixed assets

A fixed asset is recognized when, and only when, it is probable that future economic benefits that are associated with the fixed asset will flow to the Group and the cost can be measured reliably. Subsequent expenditures related to a fixed asset are recognized in the carrying amount of the fixed asset if the above recognition criteria are met, and the book value of the replaced part is derecognized; otherwise, those expenditures are recognized in profit or loss as incurred.

Fixed assets are initially recognized at cost taking into account the impact of expected future disposal expenditure. Cost of purchased fixed assets includes purchasing price, relevant taxes, and any directly attributable expenditure for bringing the asset to working conditions for its intended use.

Except freehold lands account no appreciation, other fixed assets are depreciated on a straight-line basis, and the respective estimated useful lives, estimated residual values and annual depreciation rates are as follows:

	Useful life	Estimated Residual value ratio	Annual depreciation rate
Buildings (excluding temporary plants)	30 years	5%	3.17%
Electronic equipment	5–10 years	5%	9.5%–19%
Machinery equipment	5–10 years	5%	9.5%–19%
Motor vehicles	5–10 years	5%	9.5%–19%
Other equipment	5 years	5%	19%

The Group reviews, at least at each year end, useful lives, estimated residual values and depreciation methods of fixed assets and makes adjustments if necessary.

For details of impairment test methods and impairment provision methods for fixed assets, please refer to Note II.23.

14. Construction in progress

Construction-in-progress is measured at the actual construction expenditures, including the necessary costs incurred for fixed assets before they can be put into use and other related fees.

Construction-in-progress is transferred into fixed assets when it is ready for its intended use.

For details of impairment test methods and impairment provision methods for construction in progress, please refer to Note II.23.

II. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

15. Borrowing costs

Borrowing costs are interest and other costs incurred by the Group in connection with the borrowings of funds, which include borrowing interest, amortisation of discount or premium on debt, other supplementary costs and certain foreign exchange differences that occurred from the borrowings in foreign currencies.

Borrowing costs directly attributable to the acquisition or construction of assets qualified for capitalization, i.e., fixed assets, investment properties and inventories that necessarily take a substantial period of time to get ready for their intended use or sale, are capitalized as part of the cost of those assets. Other borrowing costs are charged to current profit or loss.

Capitalization of borrowing costs begins where:

- (1) Capital expenditure has already happened;
- (2) Borrowing expenses has already incurred;
- (3) Purchasing or production activities to get the assets ready for their intended use or sale have already happened.

The capitalization of such borrowing costs ceases when the assets are substantially ready for their intended use or sale. Borrowing costs incurred afterwards are recognized in profit or loss.

During capitalization, interest of each accounting period is recognized using the following methods:

- (1) Where funds are borrowed specifically, costs eligible for capitalisation are the actual costs incurred less any income earned on the temporary investment of such borrowings.
- (2) Where funds are part of a general pool, the eligible amount is determined by applying a capitalization rate to the expenditure on that asset. The capitalization rate will be the weighted average of the borrowing costs applicable to the general pool.

Except for expected suspension under normal situation of qualifying assets, capitalization should be suspended during periods in which abnormal interruption has lasted for more than three months during the process of acquisition, construction or production. The borrowing cost incurred during interruption should be recognized as expenses and recorded in the income statement until the construction resumes.

16. Intangible assets

Intangible assets are recognised only when it is probable that economic benefits relating to such intangible; assets would flow into the Group and that their cost can be reliably measured. Intangible assets are initially measured at cost, provided that intangible assets which are acquired in a business combination and whose fair value can be reliably measured shall be separately recognized as intangible assets at fair value.

Useful life of an intangible asset is determined by the period over which it is expected to bring economic benefits to the Group. For an intangible asset with no foreseeable limit to the period over which it is expected to bring economic benefits to the Group, it is treated as an intangible asset with indefinite useful life.

Useful life of respective intangible assets is as follows:

	Estimated useful lives
Software	5 years
Technology know-how	10 years
Land use rights	50 years
Operating concession	20 years

Land use rights acquired by the Group are normally accounted for as intangible assets. Land use rights and buildings relating to plants constructed by the Group are accounted for as intangible assets and fixed assets, respectively. The costs for acquiring land and buildings are apportioned between the land use rights and buildings, or accounted for as fixed assets if they cannot be apportioned.

Straight line amortization method is used during the useful life period for intangible assets with definite useful lives. The Group reviews, at least at each year end, useful lives and amortization method for intangible assets with definite lives and makes adjustment when necessary.

The Group classifies the expenses for internal research and development as research costs and deferred development costs. All research costs are charged to the income statement as incurred. Expenditure incurred on projects to develop new products is capitalised and deferred only when the Group can demonstrate the technical feasibility of completing the intangible asset so that it will be available for use or sale, its intention to complete and its ability to use or sell the asset, how the asset will generate future economic benefits (including demonstration that the product derived from the intangible asset or the intangible asset itself will be marketable or, in the case of internal use, the usefulness of the intangible asset as such), the availability of technical and financial resources to complete the project and procure the use or sale of the intangible asset, and the ability to measure reliably the expenditure during the development. Product development expenditure which does not meet these criteria is expensed when incurred.

Corresponding projects in the Group are formed when they meet the above condition technical feasibility and economic feasibility studies. Then, those projects are progressed into the development phase.

For details of impairment test methods and impairment provision methods for intangible assets, please refer to Note II.23.

II. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

17. Provisions

Other than contingent consideration in a business combination and contingent liabilities undertaken, the Group recognizes as provision an obligation that is related to contingent matters and fulfils all the following criteria:

- (1) the obligation is a present obligation of the Group;
- (2) the obligation would probably result in an outflow of economic resources from the Group;
- (3) the obligation could be reliably measured.

Provisions are initially valued according to the best estimate of expenses on fulfilling the current liabilities, in connection with the risk, uncertainty and timing value of the currency. The book value of the provisions would be reassessed on every balance sheet date. The book value will be adjusted to the best estimated value if there is certain evidence that the current book value is not the best estimate.

18. Share-based payments

Share-based payments can be distinguished into equity-settled share-based payments and cash-settled share-based payments. Equity-settled share-based payments are transactions of the Group settled through the payment of shares of other equity instruments in consideration for receiving services.

Equity-settled share-based payments made in exchange for services rendered by employees are measured at the fair value of equity instruments granted to employees. Instruments which are vested immediately upon the grant are charged to relevant costs or expenses at the fair value on the date of grant and the capital reserve is credited accordingly. Instruments of which vesting is conditional upon completion of services or fulfillment of performance conditions are measured by recognizing services rendered during the period in relevant costs or expenses and crediting the capital reserve accordingly at the fair value on the date of grant according to the best estimates conducted by the Group at each balance sheet date during the pending period based on subsequent information such as latest updates on the change in the number of entitled employees and whether performance conditions have been fulfilled, and etc. The fair value of equity instruments is determined using the Black-Scholes option pricing model. For details see Note VII. Share-based payment.

The cost of equity-settled transactions is recognised, together with a corresponding increase in capital reserve, over the period in which the performance and service conditions are fulfilled. The cumulative expense recognised for equity-settled transactions at the end of each reporting period until the vesting date reflects the extent to which the vesting period has expired and the Group's best estimate of the number of equity instruments that will ultimately vest.

No expense is recognised for awards that do not ultimately vest, except where vesting is conditional upon a market or non-vesting condition, which are treated as vesting irrespective of whether or not the market or non-vesting condition is satisfied, provided that all other non-market conditions are satisfied.

II. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

18. Share-based payments (continued)

Where the terms of an equity-settled share-based payment are modified, as a minimum, services obtained are recognized as if the terms had not been modified. In addition, an expense is recognized for any modification which increases the total fair value of the instrument granted, or is otherwise beneficial to the employee as measured at the date of modification.

Where an equity-settled award is cancelled, it is treated as if it had vested on the date of cancellation, and any expense not yet recognized for the award is recognized immediately. Where employees or other parties are permitted to choose to fulfill non-vesting conditions but have not fulfilled during the pending period, equity-settled share-based payments are deemed cancelled. However, if a new award is substituted for the cancelled award, and designated as a replacement award on the date that it is granted, the new awards are treated as if they were a modification of the original award.

19. Revenue

Revenue is recognized when it is probable that the economic benefits will flow to the Group and the amount of the revenue can be measured reliably. Revenue is recognized on the following bases:

Revenue from the sales of goods

Revenue from sales of goods is recognized when the significant risks and rewards of ownership have been transferred to the buyer, provided that the Group maintains neither managerial involvement to the degree usually associated with ownership, nor effective control over the goods sold and related costs incurred or to be incurred can be measured reliably. Revenue from sales of goods is determined according to amounts stipulated in contracts or agreements received or receivable from buyers, unless such amounts are deemed unfair. The receipt of amounts stipulated in contracts or agreements is recognized on a deferred basis. Those with a financing nature are measured at the fair value of amounts stipulated in contracts or agreements.

Revenue from the rendering of services

On the balance sheet date, when transaction result of the rendering of services could be measured reliably, related revenue from rendering of services is recognized according to the percentage of completion, otherwise revenue is recognized only to the extent of cost incurred and expected to be recoverable. The transaction result of the rendering of services could be measured reliably by meeting the following conditions at the same time: Revenue can be measured reliably, the relevant economic benefits will flow to the Group, the percentage of construction work and relevant cost incurred or to be incurred can be measured reliably. The percentage of completion is based on the percentage of costs incurred to date on a contract relative to the estimated total contract costs. Total revenue for the rendering of services is determined according to amounts stipulated in contracts or agreements received or receivable by workers, unless such amounts are deemed unfair.

Where the sales of goods and rendering of services are included in contracts or agreements between the Group and other enterprises, revenue is separately recognized according to the fair values of various sales items in the contracts, by reference to the aforesaid principles for revenue recognition.

II. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

19. Revenue (continued)

Construction contracts

Construction contract revenue and cost are recognised by percentage of completion at the balance sheet date where the results of the contract could be reliably estimated, otherwise revenue is recognized on the basis of the actual contract cost amount which has been incurred and is expected to be recoverable. The results of the contract can be reliably estimated if it is probable that economic benefits relating to the contract will flow to the Group and the actually incurred contract cost can be clearly distinguished and reliably measured. For contracts with fixed prices, the following conditions should also be met: the total revenue of the contract can be reliably measured, and percentage of completion and outstanding cost for completion can be reliably estimated. The percentage of completion is based on the percentage of costs incurred to date on a contract relative to the estimated total contract costs. Total contract revenue includes initial income stipulated by the contract and income derived from contract modifications, compensation and rewards, and etc.

Interest income

Interest income is determined by the length of time for which the Group's cash is in use by other parties and the effective interest rate.

20. Government grants

Government grants are recognized when there is reasonable assurance that the grant will be received and all attaching conditions will be complied with. The grant is measured as the amount received or receivable where it takes the form of a cash asset, or at fair value where it is not a cash asset. Where the fair value cannot be reliably obtained, it should be measured at the nominal value. Government grants, relating to income and applied towards reimbursement of related costs or losses in subsequent periods, are recognized as deferred income and taken to current profit or loss for the period in which the related costs are recognized. Government grants, applied towards reimbursement of related costs or losses already incurred, are directly recognized in current profit or loss. Where the grant relates to an asset, it is recognized as a deferred income and allocated to the income statement over the expected useful life of the relevant asset by equal annual instalments. Where the grant is measured at nominal value, it is directly recognized in current profit or loss.

21. Income tax

Income taxes include current and deferred tax. Income taxes are recognized in current period's profit or loss as income tax expense or income tax benefit, except for the adjustment made for goodwill in a business combination and income tax from transactions or items that directly related to equity.

For current period's deferred tax assets and liabilities arising in current and prior periods, the Group measures them at the amount expected to be paid or recovered according to the relevant taxation regulations.

II. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

21. Income tax (continued)

The Group recognizes deferred tax assets and liabilities based on temporary differences using balance sheet liability method. Temporary differences are differences between the carrying amount of assets or liabilities in the balance sheet and their tax base on the balance sheet date. Temporary differences also include the differences between the book values and tax bases of items not recognized as assets or liabilities where the tax base can be calculated according to the relevant tax regulations.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- (1) Where the taxable temporary difference arises from goodwill or the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;
- (2) In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, carryforward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carryforward of unused tax credits and unused tax losses can be utilised except:

- (1) where the deductible temporary differences arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;
- (2) in respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are only recognized to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

As at balance sheet date, deferred tax assets and liabilities are measured in accordance with relevant tax laws at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, and reflects the tax consequences that would follow the manner in which the Group expects, at the balance sheet date, to recover the assets or settle the carrying amount of its assets and liabilities.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at the end of each reporting period and are recognised to the extent that it has become probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be recovered.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

II. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

22. Leases

Other than leases under which substantially all risks and rewards of ownership are transferred, which are classified as finance lease, all leases are classified as operating leases.

As lessee of operating leases

Rental expenses under operating leases are recognized as relevant asset costs or in current profit or loss on the straight-line basis over the lease term. Contingent rental is charged to current profit or loss when incurred.

23. Impairment

The Group assesses impairment of assets other than inventories, deferred tax assets, financial assets and long-term equity investments under cost accounting which are not quoted in an active market and whose fair value cannot be reliably measured, using the methods described below:

The Group assesses at each balance sheet date whether there is an indication that a non-financial asset may be impaired. If any such indication exists, the Group makes an estimate of the asset's recoverable amount and performs a test of impairment for the asset. For goodwill generated from business consolidation and intangible assets with indefinite useful lives, tests for impairment is performed at least annually regardless of whether there are indications of impairment. Intangible assets which are not yet ready for use are also tested annually for impairment.

Recoverable amount is the higher of the asset's fair value less costs to sell and its present value of estimated future cash flows. The Group estimates recoverable value for individual assets. When it is difficult to estimate individually, the recoverable value of the cash generating units which the asset belongs to will be estimated. The definition of cash generating units is determined on the basis of whether the cash generating units generate cash flows which are largely independent of those from other cash generating units.

Where the carrying amount of an asset or a cash generating unit exceeds its recoverable amount, the asset or cash generating unit is considered impaired and is written down to its recoverable amount. The difference between the carrying amount and recoverable amount is recognized in the current period's profit or loss and provision for impairment is made accordingly.

In connection with impairment tests for goodwill, the carrying value of goodwill arising from business combination is allocated to relevant cash generating units ("CGU") from the date of acquisition on a reasonable basis. If it is difficult to allocate such goodwill to a relevant CGU, it should be allocated to a relevant CGU group. A relevant CGU or CGU group is defined as one which can benefit from the synergies of the business combination and is not larger than the reporting segments determined by the Group.

II. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

23. Impairment (continued)

In connection with impairment tests for CGUs or CGU groups that comprise goodwill, where indications of impairment exists in a CGU or CGU group related to goodwill, impairment tests should be performed first on CGUs or CGU groups that do not comprise goodwill and recognize impairment loss after estimating the recoverable amount. Then impairment tests on CGUs or CGU groups that comprise goodwill should be performed and the carrying value and recoverable amount should be compared. Where the recoverable amount is lower than the carrying value, the impairment loss should first be offset against the carrying value of the goodwill allocated to CGUs or CGU groups and then against assets in the CGUs or CGU groups other than goodwill in proportion to the weighting of these assets.

Previously recognised impairment losses are not reversed in subsequent periods.

24. Employee benefits

Employee benefits represent all kinds of benefits (other than share-based payments) and other relevant expenditures incurred by the Group in exchange for service rendered by employees. During the accounting period when employees provide services, employee benefits payable is recognized as a liability. Items which expire longer than one year after the balance sheet date are measured at present value if the discounting impact is significant.

Defined contribution pension scheme

Employees of the Group participated in contribution pension scheme managed by the local government, including pension scheme, medical insurance, unemployment insurance and housing fund. The contribution costs are charged as asset cost or to current profit or loss when incurred.

Defined benefits pension scheme

The Group provides certain employees, who joined the Group before 1 January 2002, with postretirement monthly pension payments. The cost of providing these benefits under the Group's defined benefits pension scheme is actuarially determined and recognized over the employees' service period by using the projected unit credit method. The Group makes monthly pension payments to eligible retirees. The Group has not held any plan assets since the commencement of the defined benefits pension scheme, therefore it is not required to make any forecast on asset return.

25. Profit distribution

Cash dividend of the Company is recognized as liability after approval by the general meeting.

26. Related parties

A related party of a company is one who controls or jointly controls or exercises significant influence over that company or is, together with that company, under the control or joint control of another party.

II. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

27. Segment reporting

The Group defines its operating segments on the basis of its internal organisational structure, management requirements and internal reporting system. The reporting segments and information to be disclosed in respect of each segment are determined on the basis of the operating segments.

An operating segment is an integral part of the Group satisfying all of the following conditions:

- (1) being able to generate income and incur expenses in its day-to-day activities;
- (2) the operating results of which can be assessed by the Company's management on a regular basis in order to make decisions about resource allocation and performance assessment;
- (3) accounting information of such segment, such as financial conditions, results of operations and cash flow, can be obtained by the Group.

Two or more operating segments with similar economic characteristics and in fulfillment of certain conditions may be consolidated into one operating segment.

28. Significant accounting judgements and estimates

The preparation of financial statements requires judgement and estimation of the management. Such judgement and estimation will affect the reported amounts of revenue, expenses, assets and liabilities and the disclosure of contingent liabilities as at the balance sheet date. However, the consequence arising from the uncertain nature of such estimation may result in significant adjustment to the book value of the asset or liability affected in the future.

Judgements

In the process of applying the Group's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognized in the financial statements:

Revenue recognition

The Group's material revenue streams are the result of a wide range of activities, from custom design and installation over a period of time to a single delivery of equipment to a customer. The Group's networking solutions also cover a broad range of technologies and are offered on a global basis. As a result, our revenue recognition policies can differ depending on the level of customization within the solution and the contractual terms with the customer. Newer technologies within one of the Group's reporting segments may also have different revenue recognition policies, depending on, among other factors, the specific performance and acceptance criteria within the applicable contracts. Therefore, management must use significant judgement in determining how to apply the current accounting standards and interpretations, not only based on the networking solutions, but also within networking solutions based on reviewing the level of customization and contractual terms with the customer. As a result, our revenues may fluctuate from period to period based on the mix of solutions sold and the geographic regions in which they are sold.

II. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

28. Significant accounting judgements and estimates (continued)

Judgements (continued)

Revenue recognition (continued)

When a customer arrangement involves multiple deliverables where the deliverables are governed by more than one authoritative standard, the Group evaluates all deliverables to determine whether they represent separate units of accounting based on the following criteria:

- 1) whether the delivered item has value to the customer on a stand alone basis;
- 2) whether there is objective and reliable evidence of the fair value of the undelivered item(s); and
- 3) if the contract includes a general right of return relative to the delivered item, delivery or performance of the undelivered item(s) is considered probable and is substantially in the Group's control.

The Group's determination of whether deliverables within a multiple element arrangement can be treated separately for revenue recognition purposes involves significant estimates and judgement, such as whether fair value can be established on undelivered items and/or whether delivered elements have standalone value to the customer. Changes to the Group's assessment of the accounting units in an arrangement and/or its ability to establish fair values could significantly change the timing of revenue recognition.

If objective and reliable evidence of fair value exists for all units of accounting in the contract, revenue is allocated to each unit of accounting or element based on relative fair values. In situations where there is objective and reliable evidence of fair value for all undelivered elements, but not for delivered elements, the residual method is used to allocate the contract consideration. Under the residual method, the amount of revenue allocated to delivered elements equals the total arrangement consideration less the aggregate fair value of any undelivered elements. Each unit of accounting is then accounted for under the applicable revenue recognition guidance. If sufficient evidence of fair value cannot be established for an undelivered element, revenue related to delivered elements is deferred until the earlier of when sufficient fair value is established and when all remaining elements have been delivered. Once there is only one remaining element to be delivered within the unit of accounting, the deferred revenue is recognized based on the revenue recognition guidance applicable to the last delivered element. For instance, where post-contract support is the last delivered element within the unit of accounting, the deferred revenue is recognized ratably over the remaining post-contract support term once postcontract support is the only undelivered element.

The Group's assessment of which revenue recognition guidance is appropriate for accounting for a deliverable also can involve significant judgement. For instance, the determination of whether software is more than incidental to hardware can impact on whether the hardware is accounted for based on software revenue recognition guidance or based on general revenue recognition guidance. This assessment could significantly impact the amount and timing of revenue recognition.

II. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

28. Significant accounting judgements and estimates (continued)

Judgements (continued)

Revenue recognition (continued)

For elements related to customised network solutions and certain network build-outs, revenues are recognized under the ASBE No. 15 Construction Contract, generally using the percentage-of-completion method. In using the percentage-of-completion method, revenues are generally recorded based on a measure of the percentage of costs incurred to date on a contract relative to the estimated total expected contract costs. Profit estimates on long-term contracts are revised periodically based on changes in circumstances and any losses on contracts are recognized in the period that such losses become known. Generally, the terms of long-term contracts provide for progress billing are based on completion of certain phases of work. Contract revenues recognized, based on costs incurred towards the completion of the project, that are unbilled are accumulated in the contracts in progress account included in amount due from customers for contract works. Billings in excess of revenues recognized to date on long-term contracts are recorded as advance billings in excess of revenues recognized to date on contracts within amount due to customers for contract works. Significant judgement is often required when estimating total contract costs and progress to completion on these arrangements, as well as whether a loss is expected to be incurred on the contract. Management uses historical experience, project plans and an assessment of the risks and uncertainties inherent in the arrangement to establish these estimates. Uncertainties include implementation delays or performance issues that may or may not be within the control of the Group. Changes in these estimates could result in a material impact on revenues and net earnings.

Revenue for hardware that does not require significant customisation, and where any software is considered incidental, is recognized under ASBE No. 14 Revenue, revenue is recognized provided that: it is probable that the economic benefits of the income will flow to the Group; the amount can be reliably measured; the Group has transferred the principal risks and rewards of ownership to the buyer and has not retained ongoing management and effective control usually associated with ownership; and relevant costs incurred or to be incurred can be reliably measured.

For hardware, delivery is considered to have occurred upon shipment provided that the risk of loss and title have been transferred to the customer. For arrangements where the criteria for revenue recognition have not been met because legal title or the risk of loss on products was not transfer to the buyer until final payment had been received or where delivery had not occurred, revenue is deferred to a later period when title or the risk of loss passes either on delivery or on receipt of payment from the customer.

For further information on the Group's revenue recognition policies relating to our material revenue streams, please refer to Note II. 19 to the consolidated financial statements.

II. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

28. Significant accounting judgements and estimates (continued)

Judgements (continued)

Deferred tax liabilities arising from dividend distribution

The Group is required to recognize deferred tax liabilities for taxable temporary differences relating to investments in certain subsidiaries, unless two conditions are met as follows: the Group is able to control the timing of the reversal of the temporary difference and such temporary difference is not likely to be reversed in the foreseeable future. The Group is of the view that it is able to fully control the timing of the reversal of the temporary difference arising from dividend distribution of the subsidiary and that the subsidiary will not make any profit distribution in the foreseeable future. Therefore, the Group has not recognised any deferred income tax liability. For details please refer to Note V.16.

Estimation uncertainty

The key assumptions concerning the future and other key sources of estimation uncertainty at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within subsequent financial years, are discussed below.

Impairment of fixed assets, construction in progress and intangible assets

The Group assesses at each balance sheet date whether there is an indication that fixed assets, construction in progress and intangible assets may be impaired. If any such indication exists, the Group makes an estimate of the asset's recoverable amount and performs a test of impairment for the asset. The recoverable amount is measured at the net amount of the fair value of the asset less disposal costs or the present value of the estimated future cash flow of the asset, whichever is higher. This requires an estimate of the expected future cash flows from the asset or the cash-generating unit to which the asset was allocated and also to choose a suitable discount rate in order to calculate the present value of those cash flows.

An impairment loss is recognized when the carrying amount of fixed assets, construction in progress and intangible assets exceeds the recoverable amount. The carrying amount is written down to the recoverable amount and the write-down is charged to current profit or loss, while corresponding provision for asset impairment is also made.

Impairment of financial assets

The Group determines whether financial assets are impaired by estimating the future cash flow from the financial assets. An impairment loss is recognized only if the carrying amount of an asset exceeds the present value of estimated future cash flows discounted at the financial asset's original effective interest rate, taking into account the value of the related collateral. Where the actual future cash flows and less than expected, an impairment loss may arise.

II. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

28. Significant accounting judgements and estimates (continued)

Estimation uncertainty (continued)

Equity settled share expense

The estimated cost of the share incentive scheme is recognized in income statements based on estimation of various assumptions, including that in relation to the turnover rate of respective participants under the scheme. In situation that the actual turnover rate is less than the management estimation, such cost would be higher.

Depreciation and amortization

The Group depreciates items of fixed assets on the straight-line basis over their estimated useful lives, and after taking into account their estimated residual value, commencing from the date the items of fixed assets are placed into productive use. The estimated useful lives and dates that the Group places the items of fixed assets into productive use reflect the directors' estimate of the periods that the Group intends to derive future economic benefits from the use of the Group's fixed assets.

Deferred development costs

In determining the amount of capitalization, the management must make assumptions concerning the expected future cash flow, applicable discount rate and expected beneficial period.

Deferred tax assets

Deferred tax assets are recognized for all unused tax losses, to the extent that it is likely that taxable profit will be available to utilize these unused tax losses. Significant judgments are needed from management to estimate the timing and amount of taxable profit as well as applicable tax rate in the future, with tax planning strategies, to determine the amount of the deferred tax assets that should be recognized.

	Sub-total			783,533			407,009
	Total			15,748,613			15,383,207

As at 30 June 2011, the Group's cash subject to ownership restriction amounted to RMB783,533,000 (31 December 2010: RMB407,009,000), including acceptance bill deposits of RMB452,963,000 (31 December 2010: RMB180,048,000), letter of credit deposits of RMB7,142,000 (31 December 2010: RMB27,220,000), guarantee letter deposits of RMB72,893,000 (31 December 2010: RMB27,891,000) and risk compensation fund to be released within one year of RMB250,535,000 (31 December 2010: RMB171,850,000).

Under the loan agreements or factored trade receivables agreements between the Group and certain domestic banks, provisions are being made for a risk compensation fund at a mutually determined percentage based on the risk profile of the facilities concerned. The risk compensation fund shall be released on a pro-rata basis in respect of the facilities if there is no overdue principal or interest payment at the agreed final payment date, or when the principal and interest of the banking facilities have been fully settled. As at 30 June 2011, the risk compensation fund under the arrangements for loans and factored trade receivables amounted to RMB1,317,208,000 (31 December 2010: RMB1,261,936,000). Risk compensation fund to be released within one year amounting to RMB250,535,000 (31 December 2010: RMB171,850,000) was accounted for as cash subject to ownership restriction. Risk compensation fund to be released after one year amounting to RMB1,066,673,000 (31 December 2010: RMB1,090,086,000) was accounted for as other non-current assets.

As at 30 June 2011, the Group's overseas currency deposits amounted to RMB2,013,291,000 (31 December 2010: RMB2,779,314,000).

Current bank deposits earn interest income based on current deposit interest rate. The period for short-term time deposits varies from 7 days to 12 months. The short-term time deposits, subject to the Group's cash needs, earn interest income based on corresponding time deposits interest rate. Time deposits with a term of over three months amounting to RMB97,550,000 (31 December 2010: RMB71,099,000) were not included in cash and cash equivalents.

	30 June 2011
Opening balance	3,755,790
Interest expenses	79,982
Interest payments	(32,000)
Closing balance	3,803,772

On 30 January 2008, the Company issued 40,000,000 Bonds cum Warrants with a nominal value of RMB100 each and a total amount of RMB4 billion. The bonds and the warrants are listed on the Stock Exchange of Shenzhen. The bonds with warrants are guaranteed by China Development Bank, and are fully redeemable within 5 years from the date of issue. Holders of the bonds have also been issued 1.63 warrants at nil consideration for every bond issued and therefore a total of 65,200,000 warrants have been issued. The warrants are valid for 24 months from the date of listing. Holders of the Warrants are entitled to subscribe for one A Share for every two warrants held at an initial exercise price of RMB78.13 per Share. In the event of any ex-rights or ex-dividend netting of share prices during the effective period for the warrants, the exercise price and exercise ratio of the warrants will be adjusted accordingly. As the Company distributed share dividend and issued bonus shares during 2008 and 2009, the exercise price of the warrants was adjusted to RMB42.394 per share and the exercise ratio was adjusted to the subscription of 0.922 A share for each warrant held.

As at the close of trading on 12 February 2010, a total of 23,348,590 “中興ZXC1” warrants were exercised and 21,523,441 new shares were issued as a result.

The coupon interest rate of the Bonds cum Warrants is 0.8% per annum payable on 30 January of each year. At the issue of the bonds, interest rates of similar bond issues (without warrants) in the market were higher than the interest rate of the bond cum warrants.

The fair value of the liability component of the Bonds cum Warrants was assessed by reference to interest rates of similar bond issues (without warrants) in the market at the issue date.

The net book value of the liability component of the Bonds cum Warrants at the issue date was set out as follows:

Coupon value of Bonds cum Warrants	4,000,000
Equity component	(580,210)
Direct transaction costs attributable to the liability component	(38,556)
Liability component at issue date	3,381,234

45. Earnings per share

Basic earnings per share is computed by dividing the net profit attributable to equity holders of the parent for the period by the weighted average number of ordinary shares in issue.

In the calculation of diluted earnings per share, net profit attributable to ordinary equity holders of the Company for the period is adjusted for the following: (1) interests on potentially dilutive ordinary shares recognized as expenses for the period; (2) income or expenses arising from the conversion of potentially dilutive ordinary shares; and (3) income tax effect on the above adjustments.

In the calculation of diluted earnings per share, the denominator shall be the sum of: (1) weighted average number of ordinary shares of the Company in issue adopted in the calculation of basic earnings per share; and (2) weighted average number of ordinary shares created assuming conversion of potentially dilutive ordinary shares into ordinary shares.

In calculating the weighted average number of ordinary shares created upon conversion of potentially dilutive ordinary shares into ordinary share, potentially dilutive ordinary shares issued in previous periods are assumed to have been converted at the beginning of the current year, whereas potentially dilutive ordinary shares issued in the current period are assumed to have been converted on the date of issue.

Calculations of basic and diluted earnings per shares were as follows:

	Six months ended 30 June 2011	Six months ended 30 June 2010
Earnings		
Net profit attributable to ordinary shareholders of the Company for the period	769,271	877,489
Shares		
Weighted average number of ordinary shares of the Company (Note 1)	2,804,325	2,736,790
Diluting effect — weighted average number of ordinary shares:		
Restricted Shares under share incentive scheme (Note 2)	61,864	64,928
Adjusted weighted average number of ordinary shares of the Company	2,866,189	2,801,718

Note 1: During the reporting period, 62,407,186 restricted shares subject to lock-up were excluded from the outstanding ordinary shares in issue.

Note 2: As the valid shares under the Phase I Share Incentive Scheme of the Company remaining in lock-up gave rise to potentially dilutive ordinary shares of 61,864,408 shares and 64,928,143 shares for the reporting period and the same period of 2010, respectively, diluted earnings per share has been calculated on the basis of basic earnings per share taking into account the said factors.

2. Share incentive scheme

The implementation of the Phase I Share Incentive Scheme (Revised Version dated 5 February 2007) (hereinafter referred to as the "Share Incentive Scheme") commenced upon consideration and approval by shareholders at the first extraordinary general meeting of the Company for 2007 convened on 13 March 2007, after the receipt of a no-comment letter from the China Securities Regulatory Commission. The Company granted 47,980,000 Subject Shares to the Scheme Participants by way of the issue of new shares (A shares), including the grant to 3,435 Scheme Participants of Subject Share quotas with 43,182,000 shares (accounting for 90% of the Subject Share quotas under the Share Incentive Scheme, hereinafter referred to as the "First Award") and the reservation of 4,798,000 Subject Shares accounting for 10% of the Subject Share quotas under the Share Incentive Scheme. At the Twentieth Meeting of the Fourth Session of the Board of Directors held on 25 November 2008, the grant of the full amount of the reserved Subject Share quotas to 794 Scheme Participants (hereinafter referred to as the "Second Award") was considered and approved. The Scheme Participants of the Share Incentive Scheme were the directors and senior management of the Company and key staff of the Company and its subsidiaries.

The grant price of the Share Incentive Scheme shall be the closing price of the Company's A shares as quoted on the Shenzhen Stock Exchange on the trading day immediately preceding the date of the Board Meeting at which the Share Incentive Scheme is reviewed. The price of the First Award was RMB30.05 per share. Scheme Participants shall pay the subscription amounts for the Subject Shares on the basis of the purchase of 5.2 Subject Shares for every 10 Subject Shares granted, out of which the subscription amounts for 3.8 Subject Shares shall be funded by Scheme Participants at their own cost and the subscription amounts for 1.4 Subject Shares shall be funded by the conversion of the deferred bonus that Scheme Participants would have received had they participated in the distribution of 2006 deferred bonus, calculated as a percentage of the grant price. The price of the Second Award was RMB21.28 per share. Scheme Participants shall pay the subscription amounts for the Subject Shares on the basis of the purchase of 5.2 Subject Shares for every 10 Subject Shares granted.

VII. SHARE-BASED PAYMENT (CONTINUED)

2. Share incentive scheme (continued)

The Share Incentive Scheme shall be valid for 5 years, comprising a lock-up period of 2 years and an unlocking period of 3 years:

- (1) The Lock-up Period shall last for a period of two years commencing on the date of approval of the Share Incentive Scheme by shareholders in a general meeting of the Company, during which the Subject Shares granted to Scheme Participants under the Share Incentive Scheme shall be subject to lock-up and shall not be transferable;
- (2) The Unlocking Period shall last for three years following expiry of the Lock-up Period, during which Scheme Participants may, subject to unlocking conditions stipulated by the Share Incentive Scheme being satisfied, apply for unlocking in three tranches: the first unlocking period shall be the first year following the expiry of the Lock-up Period and the number of shares to be unlocked shall not exceed 20% of the aggregate number of Subject Shares granted; the second unlocking period shall be the second year following the expiry of the Lock-up Period and the number of shares to be unlocked shall not exceed 35% of the aggregate number of Subject Shares granted; the third unlocking period shall be the third year following the expiry of the Lock-up Period and the number of shares to be unlocked shall represent all outstanding Subject Shares.

The unlocking of Subject Shares shall be conditional upon the simultaneous fulfilment of certain conditions, including but not limited to the following:

- (1) The Company's financial and accounting report for the most recent accounting year does not contain an audit report in which the certified public accountants indicate an opinion of disapproval or inability to express any opinion;
- (2) The Scheme Participant has not been subject to administrative penalties by the CSRC due to material non-compliance by the Company during the past three years;
- (3) The weighted average rates of return on net assets of ZTE for the years 2007, 2008 and 2009 shall be adopted as the results appraisal conditions to Scheme Participants' application for unlocking the Subject Shares in the first, second and third tranches, respectively. Such rates of return on net assets shall not be less than 10% (before or after extraordinary income/loss items, whichever is lower).

In accordance with the relevant terms of the Share Incentive Scheme, Subject Shares granted but which have lapsed in the absence of unlocking shall be repurchased and cancelled by the Company at the corresponding subscription amounts plus interest calculated at the prevailing call deposit interest rate published by the People's Bank of China.

VII. SHARE-BASED PAYMENT (CONTINUED)

2. Share incentive scheme (continued)

The fair value of the Subject Shares was arrived at based on the market price of the Company's shares on the date of grant using the Black-Scholes model, which ranged from RMB21.28 to RMB36.81 per share. The aggregate fair value of the Subject Shares amounting to RMB1,106,794,000 is charged to profit and loss and the capital reserve as costs and expenses from the date of grant to the date on which the unlocking conditions are being fulfilled and the shares may be circulated according to the law. The Group has recognised an amount of RMB34,670,000 (six months ended 30 June 2010: RMB79,478,000) at Share Incentive Scheme expenses for the reporting period and an aggregate amount of RMB1,092,920,000 (31 December 2010: RMB1,058,250,000) has been recognised in expenses as at the end of the reporting period on an accumulative basis.

The proposals of profit distribution and capitalisation from capital reserve for 2007 were implemented on 10 July 2008, whereby 4 shares were issued for every 10 shares held. The proposals of profit distribution and capitalisation from capital reserve for 2008 were implemented on 4 June 2009, whereby 3 shares were issued for every 10 shares held. As a result, the Subject Share quotas of the Phase I Share Incentive Scheme were adjusted to 87,323,600 shares accordingly, representing the adjustments of the Subject Share quotas under the First Award and the Second Award to 78,591,240 shares and 8,732,360 shares, respectively. Taking into consideration the departure of or waiver of participation in the Share Incentive Scheme by certain Scheme Participants, it was ratified at the Twenty-sixth Meeting of the Fourth Session of the Board of Directors of the Company held on 6 July 2009 that a total Subject Share quota of 85,050,238 shares had been granted to 4,022 Scheme Participants under the Share Incentive Scheme, and the registration of such shares with China Securities Depository and Clearing Company Limited, Shenzhen Branch was completed on July 2009. The total number of issued share capital of the Company has increased by 85,006,813 shares, after deducting 43,425 Subject Shares which have lapsed.

In accordance with the Share Incentive Scheme, Subject Shares under the First Award shall be subject to a lock-up period of two years commencing on 13 March 2007 (the date on which the Share Incentive Scheme was approved by the shareholders in a general meeting of the Company). As at 12 March 2009, the lock-up period for Subject Shares under the First Award had expired and the unlocking conditions had been fulfilled. For details of the unlocking of Subject Shares, please refer to Note 33.

VIII. CONTINGENT EVENTS

- In August 2006, a customer instituted arbitration against the Company to demand indemnity from the Company in the amount of PKR762,982,000 (approximately RMB57,516,000). Meanwhile, the Company instituted a counter-claim against the customer's breach of contract to demand for damages. In February 2008, the arbitration authority issued its award ruling that an indemnity of PKR328,040,000 (approximately RMB24,729,000) is to be paid by the Company. On the balance sheet date, the Company has made provisions for the amount. In accordance with local laws, the Company had filed with the local court an objection against the arbitration award and a counter-claim against the customer's breach of contract. According to the legal advice of the lawyer engaged by the Company, the litigation is likely to continue for a considerable amount of time. As at the date of approval of the financial statements, the Group had not made any payments of compensation pursuant to the aforesaid judgement. Based on the legal advice from the lawyer engaged by the Company, it is difficult to predict the final outcome of the case at this stage. The directors are of the opinion that the aforesaid arbitration will not have any material adverse impact on the financial conditions and operating results of the Group. Accordingly, the Company has not made any further provisions.
- In April 2008, China Construction Fifth Engineering Division Corp., Ltd. ("China Construction Fifth"), an engineering contractor of the Company, demanded the Company to increase the contract amount on the grounds that raw material prices had increased in connection with which it launched first a slowdown in work, followed later by total suspension. In September 2008, the Company instituted litigation with the Nanshan District People's Court, pleading for the revocation of the contract and court order of the evacuation of the work sites by the defendant, as well as a penalty payment for work delay in the amount of RMB24,912,000 and damages of RMB11,319,000 payable to the Company. The Nanshan District People's Court handed the first trial judgement in July 2009, ruling that the contract between the Company and China Construction Fifth be revoked and a penalty payment for work delay in the amount of RMB12,817,000 be payable by China Construction Fifth. China Construction Fifth had appealed against the said judgement to the Nanshan District People's Court. As of now, court hearing for the second trial has been completed and the court has ordered trial of the case to be suspended pending the final judgement of the case of China Construction Fifth Division at the Intermediate Court. In July 2009, China Construction Fifth instituted a separate litigation with the Shenzhen Intermediate People's Court, demanding the Company to make a payment of RMB75,563,000 for raw materials and staff deployment. The said cases are currently in trial. In October and November 2009, the Group further instituted two complaints with the Nanshan District People's Court, demanding China Construction Fifth to undertake a penalty payment for work delay in the amount of RMB30,615,000 and the payment of RMB39,537,000, representing the amount of work payments in excess of the total contract amount. As of now the two trials have suspended. Based on the legal opinion furnished by the legal counsel engaged by the Company and the existing judgements and current progress of the case, it is difficult to ascertain the final outcome of this case at the present stage. The directors are of the opinion that the aforesaid arbitration will not have any material adverse impact on the financial conditions and operating results of the Group.

VIII. CONTINGENT EVENTS (CONTINUED)

3. A lawsuit on breach of agreement and infringement of rights was instituted against the Company and its subsidiary ZTE (USA), Inc. ("ZTE (USA)") by Universal Telephone Exchange, Inc. ("UTE") at the district court of Dallas, Texas, the United States, alleging that the Company and ZTE (USA) had violated a confidential agreement between UTE and ZTE (USA), for which UTE was seeking a compensation of USD20 million in actual damages. UTE further claimed that it had lost a telecommunications project contract as a result of inappropriate actions of the Company and ZTE (USA), for which UTE was seeking a compensation of USD10 million in actual damages and USD20 million in punitive damages. The compensation demanded by UTE as aforesaid amounted to USD50 million in aggregate. The Company's attorney filed a written response to the court denying UTE's charges against the Company and ZTE (USA). Meanwhile, the Company's attorney also disputed the jurisdiction of the said U.S. court over the Company. On 8 February 2011, UTE filed a Discovery Request in respect of the Company and ZTE (USA) in response to the dissent on jurisdiction raised by the Company, and the court gave permission to UTE to conduct investigations in respect of the issue. Our attorney disputed the Discovery Request filed by UTE and applied to the court for the lawsuit to be dismissed on the grounds that UTE's business license in Texas was terminated on 21 May 2010 and therefore, according to Texan laws, had no right to institute lawsuits in Texas or to require the Company to disclose any relevant information. On 29 March 2011, UTE pleaded the court to reject ZTE (USA)'s dissent and to rule in favour of UTE's rights to institute relevant legal actions. The case is currently pending court trial. Based on the legal opinion furnished by the legal counsel engaged by the Company and the existing judgements and current progress of the case, it is difficult to ascertain the final outcome of this case at the present stage.

4. Telefonaktiebolaget LM Ericsson (publ) ("Ericsson") instituted a lawsuit against ZTE (UK) LIMITED ("ZTE (UK)"), a wholly-owned subsidiary of the Company, alleging infringement on Ericsson's patent technologies by several handset models of ZTE (UK) and demanding ZTE (UK) to discontinue such act of infringement and compensate for Ericsson's losses. The Company filed a defense on 20 June 2011 and the case is currently pending trial to be scheduled by the court. On 1 April 2011, Ericsson applied to the Court of Rome for provisional injunction procedures against ZTE Italy S.r.l. ("ZTE Italy"), the subsidiary in Italy. Such request was rejected by the court, which ordered Ericsson to serve a claim on ZTE Italy. In response to the aforesaid claims, ZTE Italy submitted its defense to the court and requested the court to reject the litigation claim of the claimant. As at the end of the reporting period, the ruling of the court had not been officially served upon the two parties. On 14 April 2011 and 23 May 2011, Ericsson filed lawsuits against ZTE Deutschland GmbH ("ZTE Deutschland"), a wholly-owned subsidiary of the Company, with the district court of Dusseldorf and the district court of Mannheim in Germany, respectively, alleging infringement of Ericsson's patent technologies and demanding ZTE Deutschland to discontinue such act of infringement and compensate for Ericsson's losses. The local courts have initially set the amount in dispute in this case at EUR10.80 million and EUR2.275 million, respectively. ZTE Deutschland is currently preparing for its defense. Based on the legal opinion furnished by the legal counsel engaged by the Company and the existing judgements and current progress of the case, it is difficult to ascertain the final outcome of this case at the present stage. The Directors are of the view that the aforesaid case will not have any material and adverse impact on the financial conditions and results of operation of the Group for the current period.

VIII. CONTINGENT EVENTS (CONTINUED)

5. On 5 April 2011, a certain customer in Ecuador filed an application for arbitration with the Business Arbitration Tribunal of Guayaquil, Ecuador, claiming quality problems existed in the works performed by the Company and demanding a total compensation amount of USD23.35 million from the Company, comprising USD22.25 million as reimbursement of the cost of network reconstruction and USD1.10 million as the cost for supervising and managing construction work quality of the entire network. In response to the demand for arbitration, the legal counsel engaged by the Company has submitted a defense in a timely manner and denied all allegations. Based on the legal opinion furnished by the legal counsel engaged by the Company and the existing judgements and current progress of the cases, it is difficult to ascertain the final outcome of this case at the present stage. The Directors are of the view that the aforesaid case will not have any material and adverse impact on the financial conditions and results of operation of the Group for the current period.
6. As at 30 June 2011, the Group had outstanding guarantees given to banks in respect of performance bonds amounting to RMB12,466,888,000.
7. As at 30 June 2011, the Group provided financial guarantee (including interests accruable) to independent customers for a maximum amount of RMB65,726,000 (31 December 2010: RMB66,179,000). The aforesaid guarantees will expire in September 2018 and December 2013 respectively.

Save as disclosed above, the Company and the Group had no other significant contingent liabilities as at 30 June 2011.

X. POST BALANCE SHEET DATE EVENTS

1. The plan of capitalisation of the capital reserve of the Company for 2010 was considered and passed at the 2010 Annual General Meeting held on 17 May 2011. The Company made a bonus issue of 2 shares for every 10 shares based on the Company's current total share capital of 2,866,731,684 shares. The equity distribution plan was completed on 7 July 2011.
2. On 8 July 2011, ZTE (H.K.) Limited ("ZTE (H.K.)") (as borrower) entered into a USD900 million syndicate loan agreement with 10 international banks including Bank of China (Hong Kong) Limited ("BOCHK") (as mandated lead arranger). In view of the future provision of loan facilities to ZTE (H.K.) by the loan syndicate pursuant to the terms and conditions of the syndicate loan agreement, the Company (as guarantor) entered, upon the request of the loan syndicate, into a guarantee agreement with BOCHK on 8 July 2011 to provide guarantee in favour of the loan syndicate to assure proper fulfillment of payments and all duties of ZTE (H.K.) under the syndicate loan agreement.
3. The unlocking of 60,532,063 Subjects Shares under the Third Unlocking of the Phase I Share Incentive Scheme of the Company was completed on 19 July 2011 and the listing and circulation of such shares commenced on 21 July 2011.
4. On 29 July 2011, the Company and ZTE (USA), the Company's subsidiary in the United States, received a statement of claim filed by a U.S. company, simultaneously with the International Trade Commission (ITC) and the Federal District Court of Delaware, respectively, in the United States, alleging the Company and ZTE (USA) of infringement upon its 3G patent rights. In the ITC case, The U.S. company demanded the issue of a permanent exclusion order and injunction that would prevent our terminal products from entering the United States. In the case filed with the District Court, damages for losses and payments of attorney fees were also demanded of the defendants, in addition to the plea for injunction, although no specific amount of compensation was named. As of the approval date of the financial statements (30 August 2011), the Company has not paid any compensation or incurred any loss because of the litigation.

XI. OTHER SIGNIFICANT MATTERS

1. Leases

As lessee:

According to the lease contract signed with lessor, the group had total future minimum lease payments under non-cancellable operating leases falling due as follows:

	30 June 2011	31 December 2010
Within one year (including first year)	423,536	449,170
In the first to second years (including second year)	295,485	306,334
In the second to third years (including third year)	232,682	233,020
After the third year	638,884	848,653
	1,590,587	1,837,177

2. Segment reporting

Operating segments

For management purposes, the Group is organised into business units based on their products and services and has three reportable operating segments as follows:

- (1) The networks (communication system) segment includes wireless communications, wireline switch and access and optical and data communications;
- (2) The terminals segment engages in the manufacture and sale of mobile phone handsets and data card products;
- (3) The telecommunications software systems, services and other products segment represent the provision of telecommunications software systems such as operation support systems and the provision of fee-based services.

Management monitors the results of the Group's operating segments separately for the purpose of making decisions about resources allocation and performance assessment. Segment performance is evaluated based on reportable segment profit, which is a measure of adjusted profit before tax. The adjusted profit before tax is measured consistently with the Group's profit before tax except that finance expenses, research and development costs, impairment losses, gain/(losses) from changes in fair values, investment income as well as head office and corporate expenses are excluded from such measurement.

Segment assets exclude deferred tax assets, cash, long-term equity investments, other receivables and other unallocated head office and corporate assets as these assets are managed on a group basis.

Segment liabilities exclude derivative financial instruments, loans, other payables, Bonds cum Warrants, tax payable, deferred tax liabilities and other unallocated head office and corporate liabilities as these liabilities are managed on a group basis.

3. Financial instruments and risk analysis

The main financial instruments of the group, except for derivatives, also include bank loans, cash and bank balances etc. The main purpose of these financial instruments is to financing for the group's operation. The group has many other financial assets and liabilities directly from operation, such as trade receivables and trade payables etc.

The Group entered into forward currency contracts and aimed at managing the foreign exchange risk in the group operation.

The main risk which comes from the Group's financial instruments is the credit risk, liquidity risk and market risk.

Classification of financial instruments

Credit risk

Credit risk is the risk of financial losses arising from default of the counterparty.

The Group only trades with recognised and creditworthy third parties. It is the Group's policy that all customers who wish to trade on credit terms are subject to credit verification procedures. In addition, receivable balances are monitored on an ongoing basis and the Group's exposure to bad debts is not significant.

The Group's other financial assets, which comprise cash and bank balances, available-for-sale financial assets, other receivables and certain derivatives. The Group's credit risk of financial assets and financial guarantee contract arises from default of the counterparty, with a maximum exposure equal to the carrying amounts of these instruments.

Although the top five accounted for 38.61% of the total trade receivables, their risk profiles were relatively low and did not give rise to significant concentration of credit risk for the Group.

Since the Group trades only with recognised and creditworthy third parties, there is no requirement for collateral.

For further quantitative disclosures on the Group's credit risk arising from trade receivables, other receivables and long-term trade receivables, please refer to Notes V.4, 5 and 10.

Liquidity risk

Liquidity risk refers to the risk of the lack of funds in performing obligations relating to financial liabilities.

The group monitors its risk to a shortage of funds using a recurring liquidity planning tool. This tool considers the maturity profile of both its financial instruments and financial assets (e.g., trade receivables, bank loans) and projected cash flows from operations.

The Group's objective is to maintain balance between the continuity and flexibility of financing through the use of bank loans, Bonds cum Warrants and other interest-bearing loans. With the exception of the non-current portion of bank borrowings, all borrowings are repayable within one year.

Capital management

The primary objective of the Group's capital management is to safeguard the Group's ability to continue as a going concern and to maintain healthy capital ratios in order to support its business and maximize shareholders' value.

The Group manages its capital structure and makes adjustments to it in the light of changes in economic conditions. To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Group is not subject to any externally imposed capital requirements. No changes were made in the objectives, policies or processes for managing capital during the six months ended 30 June 2011.

Capital management (continued)

The Group monitors capital using a gearing ratio, which is interest-bearing bank borrowings divided by the sum of total equity and interest-bearing bank borrowings. The gearing ratios as at the ends of the reporting periods were as follows:

	30 June 2011 RMB'000	31 December 2010 RMB'000
Interest-bearing bank borrowings	18,048,220	9,620,540
Total equity	24,777,733	24,961,998
Total equity and interest-bearing bank borrowings	42,825,953	34,582,538
Gearing ratio	42%	28%

Interest rate risk

Interest rate risk is the risk that the fair value/future cash flow of a financial instrument will fluctuate because of changes in market interest rate. The Group's risk exposure to movements in market interest rates is mainly related to the Group's long-term liability bearing interest at floating rates.

On 30 June 2011, the bank loans of the Group and the Company including fixed rate debts and floating debts based on LIBOR. The Group and the Company had no significant concentration of interest rate risk.

The Group's interest risk policy requires it to manage interest risk by maintaining an appropriate mix of fixed and variable rate instruments. The Group's policy requires it to maintain the fixed interest rate between 2% and 11.50%. On 30 June 2011, approximately 39.8% (31 December 2010: 39%) of the Group's borrowings bore interest at fixed rates.

All of the interest-bearing borrowings with floating interest rate are in USD. If the bank loan interest rate and the variable rate generally increase/decrease 0.25%, with other variables held constant the Group's total profit for six months ended 30 June and owner's equity as at 30 June 2011 will accordingly decrease or increase by RMB26,809,000, respectively.

Foreign currency risk

Foreign currency risk is the risk of volatility in the fair value of financial instruments or future cash flow resulting from changes in foreign currency exchange rates.

The Group has transactional currency exposures. Such exposures arise from sales or purchases by operating units in currencies other than the units' functional currency, where the revenue is denominated in USD and RMB and certain portion of the bank loans is denominated in USD. The Group tends to avoid foreign currency exchange risk or provide for allocation terms when arriving at purchase and sales contracts to minimize its transactional currency exposures. The Group takes rolling forecast on foreign currency revenue and expenses, matches the currency and amount incurred, so as to alleviate the impact to business due to exchange rate fluctuation.

Fair value

The fair values of the financial instruments of the Group did not differ significantly from their book values.

Fair value refers to the amount at which assets are exchanged and debts settled between two informed and willing parties in an arm's length transaction. Methods and assumptions adopted in the estimation of fair values are explained as follows:

The fair values of cash, bills receivable, trade receivables, bills payable and trade payables approximate their carrying values given relatively short outstanding periods.

The fair values of long-term receivables, long/short-term loans, bonds payable are determined on the basis of discounted future cash flow. The discount rate adopted is the rate of market yield for other financial instruments with substantially identical contract terms and characteristics.

The fair values of listed financial instruments are determined on the basis of market value.

Fair value (continued)

The Group has entered into derivative financial instruments with a number of counterparties (who are mainly financial institutions with sound credit rating). Derivative financial instruments include mainly forward exchange contracts, which are measured using valuation techniques similar to those adopted for forward pricing. The valuation model covers a number of inputs observable in the market, such as the credit quality of the counterparty, spot and forward exchange rates and interest rate curves. The carrying value of a forward exchange contract is identical with its fair value. As at 30 June 2011, the mark-to-market value of derivative financial assets represents the net value after offsetting credit valuation adjustments attributable to the risk of counterparty default.

The Group's measurement of fair value is distinguished into three levels:

The first level is the measurement of fair value as prices of identical assets or liabilities quoted in an active market on the date of measurement, where such prices are available; the second level is the measurement of fair value as prices of similar assets or liabilities quoted in an active market or prices of identical or similar assets or liabilities quoted in an inactive market on the date of measurement, after necessary adjustment, where such prices are available; the third level is the measurement of fair value on the basis of other parameters that reflect market participants' valuation of the assets or liabilities concerned, if no comparable traded market prices for identical or similar assets are available.

Financial instruments measured at fair value:

Six months ended 30 June 2011

Notes to Condensed Consolidated Interim Financial Statements

1. CORPORATE INFORMATION

ZTE Corporation (the “Company”) is a limited liability company established in the People’s Republic of China (the “PRC”).

The registered office of the Company is located at ZTE Plaza, Keji Road South, Hi-Tech Industrial Park, Nanshan District, Shenzhen 518057, the PRC.

During the period, the Company and its subsidiaries (collectively referred to as the “Group”) were principally involved in the design, development, manufacture and sale of telecommunications system equipment, mobile end products and solutions.

In the opinion of the directors, in accordance with the Chapter 8 Qualifications for Listing of Rules Governing the Listing of Securities on the Stock Exchange of Hong Kong Limited, the controlling shareholder of the Group is Shenzhen Zhongxingxin Telecommunications Equipment Company Limited (“Zhongxingxin”), a limited liability company registered in the PRC.

2. BASIS OF PREPARATION AND ACCOUNTING POLICIES

These financial statements have been prepared in accordance with Hong Kong Financial Reporting Standards (“HKFRSs”) (which include all Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards (“HKASs”) and Interpretations) issued by the Hong Kong Institute of Certified Public Accountants (“HKICPA”), accounting principles generally accepted in Hong Kong and the disclosure requirements of the Hong Kong Companies Ordinance. They have been prepared under the historical cost convention, except for equity investments and derivative financial instruments, which have been measured at fair value. These financial statements are presented in Renminbi (“RMB”) and all values are rounded to the nearest thousand except when otherwise indicated.

The impacts of new and revised HKFRSs and HKASs

HKAS 24 (Revised)

Related Party Disclosures

HK(IFRIC) – Int 19

Extinguishing Financial Liabilities with Equity Instruments

HKAS 24 (Revised) clarifies and simplifies the definition of related parties. It also provides for a limited exemption of related party disclosure to government-related entities for transactions with the same government or entities that are controlled, jointly controlled or significantly influenced by the same government. While the adoption of the revised standard will result in changes in the accounting policy, the revised standard is unlikely to have any impact on the related party disclosures as the Group currently does not have any significant transactions with government-related entities.

HK(IFRIC) – Int 19 *Extinguishing Financial Liabilities with Equity Instruments* addresses the accounting by an entity when the terms of a financial liability are renegotiated and result in the entity issuing equity instruments to a creditor to extinguish all or part of the financial liability. The interpretation clarifies that equity instruments issued to a creditor to extinguish a financial liability are consideration paid in accordance with HKAS 39 Financial Instruments: Recognition and Measurement and the difference between the carrying amount of the financial liability extinguished, and the consideration paid, shall be recognised in profit or loss. The consideration paid should be measured based on the fair value of the equity instrument issued or, if the fair value of the equity instrument cannot be reliably measured, the fair value of the financial liability extinguished. While the adoption of the revised standard will result in changes in the accounting policy, the revised standard does not have any impact on financial position of the Group.

2. BASIS OF PREPARATION AND ACCOUNTING POLICIES (CONTINUED)

Improvements to HKFRSs

In May 2010, HKICPA issued *Improvements to HKFRSs 2010* which set out amendments to a number of HKFRSs. These amendments were adopted by the Group since 1 January 2011. There are separate transitional provisions for each standard. While the adoption of some of the amendments results in changes in accounting policies, none of these amendments has had a significant financial impact on the Group. Details of the key amendments most applicable to the Group are as follows:

- (a) *HKFRS 3 Business Combinations*: Clarifies that the amendments to HKFRS 7, HKAS 32 and HKAS 39 that eliminate the exemption for contingent consideration do not apply to contingent consideration that arose from business combinations whose acquisition dates precede the application of HKFRS 3 (as revised in 2008).

In addition, the amendments limit the measurement choice of non-controlling interests at fair value or at the proportionate share of the acquiree's identifiable net assets to components of non-controlling interests that are present ownership interests and entitle their holders to a proportionate share of the entity's net assets in the event of liquidation. Other components of non-controlling interests are measured at their acquisition date fair value, unless another measurement basis is required by another HKFRS.

The amendments also added explicit guidance to clarify the accounting treatment for non-replaced and voluntarily replaced share-based payment awards.

- (b) *HKAS 1 Presentation of Financial Statements*: Clarifies that an analysis of other comprehensive income for each component of equity can be presented either in the statement of changes in equity or in the notes to the financial statements.
- (c) *HKAS 27 Consolidated and Separate Financial Statements*: Clarifies that the consequential amendments from HKAS 27 (as revised in 2008) made to HKAS 21, HKAS 28 and HKAS 31 shall be applied prospectively for annual periods beginning on or after 1 July 2009 or earlier if HKAS 27 is applied earlier.

The following amendments to standards do not have any impacts on the accounting policies, financial position or result of the Group:

HKFRS 1 (Revised)	Amendment to HKFRS 1 <i>First-time Adoption of Hong Kong Financial Reporting Standards – Limited Exemption from Comparative HKFRS 7 Disclosures for First-time Adopters</i>
HK(IFRIC) – Int 14 (Revised)	Amendments to HK(IFRIC) – Int 14 <i>Prepayments of a Minimum Funding Requirement</i>
HKAS 32 (Revised)	Amendment to HKAS 32 <i>Financial Instruments: Presentation – Classification of Rights Issues</i>

3. OPERATING SEGMENT INFORMATION

For management purposes, the Group is organised into business units based on their products and services and has three reportable operating segments as follows:

- (a) The networks (communication system) segment includes wireless communications, wireline switch and access and optical and data communications.
- (b) The terminals segment engages in the manufacture and sale of mobile phone handsets and data card products.
- (c) The telecommunications software systems, services and other products segment represent the provision of telecommunications software systems such as operation support systems and the provision of feebased services.

Management monitors the results of the Group's operating segments separately for the purpose of making decisions about resources allocation and performance assessment. Segment performance is evaluated based on reportable segment profit, which is a measure of adjusted profit before tax. The adjusted profit before tax is measured consistently with the Group's profit before tax except that interest income, finance costs, research and development costs, impairment losses, dividend income, share of profits and losses of associates, fair value gains/(losses) from the Group's financial instruments as well as head office and corporate expenses are excluded from such measurement.

Segment assets exclude deferred tax assets, pledged deposits, cash and cash equivalents, investments in a jointly-controlled entity and associates, other receivables, other unallocated head office and corporate assets as these assets are managed on a group basis.

Segment liabilities exclude derivative financial instruments, interest-bearing bank borrowings, other payables, Bonds cum Warrants, tax payable, deferred tax liabilities, provision for retirement benefits and other unallocated head office and corporate liabilities as these liabilities are managed on a group basis.

4. REVENUE, OTHER INCOME AND GAINS

Revenue, which is also the Group's turnover, represents the aggregate of an appropriate proportion of contract revenue from telecommunications system contracts and the invoiced value of goods and services sold net of value-added tax ("VAT") and after allowances for goods returns and trade discounts. All significant intra-group transactions have been eliminated on consolidation.

8. DIVIDEND

The Directors do not recommend any payment of interim dividend for the six months ended 30 June 2011 (Same period in 2010: nil).

9. EARNINGS PER SHARE ATTRIBUTABLE TO ORDINARY EQUITY HOLDERS OF THE PARENT

Basic earnings per share amount is computed by dividing the net profit for the period attributable to ordinary equity holders of the parent by the weighted average number of ordinary shares in issue as adjusted by the bonus issue during the year.

The calculation of diluted earnings per share amounts is based on the profit for the year attributable to ordinary equity holders of the parent and the weighted average number of ordinary shares used in the calculation is the number of ordinary shares in issue during the year, as used in the basic earnings per share calculation, and the weighted average number of ordinary shares assumed to have been issued at no consideration on the deemed exercise or conversion of all dilutive potential ordinary shares into ordinary shares.

Calculations of basic and diluted earnings per shares were as follows:

11. TRADE AND BILLS RECEIVABLES

Progress payment for telecommunications system contracts is normally made in accordance with the agreed payment schedule. The Group's trading terms with its major customers are mainly on credit, except for new customers, where payment in advance is normally required. The credit terms are normally 90 days, and can be extended to at most 1 year depending on the customers' credit rating. The credit terms for major customers are reviewed regularly by senior management. The Group seeks to maintain strict control over its outstanding receivables and has a credit control department to minimise credit risk. Overdue balances are reviewed regularly by senior management. In view of the aforementioned, there is no significant concentration of credit risk. Trade receivables are non-interest bearing.

13. CONTINGENT LIABILITIES (CONTINUED)

- (b) In August 2006, a customer instituted arbitration against the Company to demand indemnity from the Company in the amount of PKR762,984,000 (approximately RMB57,516,000). Meanwhile, the Company instituted a counter-claim against the customer's breach of contract to demand for damages. In February 2008, the arbitration authority issued its award ruling that an indemnity of PKR328,040,000 (approximately RMB24,729,000) is to be paid by the Company. The Company has set aside a provision for such amount at the end of the reporting period. In accordance with local laws, the Company had filed with the local court an objection against the arbitration award and a counter-claim against the customer's breach of contract. Based on the legal opinion furnished by lawyers engaged by the Company, the case will likely stand a prolonged period of litigation. As at the date of approval of the financial statements, the Group had not made any payments of compensation pursuant to the aforesaid judgement. Based on the legal opinion furnished by lawyers engaged by the Company, it is difficult to predict the final outcome of the case at this stage. The directors are of the opinion that the aforesaid arbitration will not have any material adverse impact on the financial conditions and operating results of the Group.
- (c) In April 2008, China Construction Fifth Engineering Division Corp., Ltd. ("China Construction Fifth"), an engineering contractor of the Company, demanded the Company to increase the contract amount on the grounds that raw material prices had increased in connection with first a slowdown in work, followed later by total suspension. In September 2008, the Company initiated litigation with the Nanshan District People's Court, pleading for the revocation of the contract and court order of the evacuation of the work sites by the defendant, as well as a penalty payment for work delay in the amount of RMB24,912,000 and damages of RMB11,319,000 payable to the Company. The Nanshan District People's Court handed the first trial judgement in July 2009, ruling that the contract between the Company and China Construction Fifth be revoked and a penalty payment for work delay in the amount of RMB12,817,000 be payable by China Construction Fifth. China Construction Fifth had appealed against the said judgement with the Nanshan District People's Court. As of now, court hearing for the second trial has been completed and the court has ordered trial of the case to be suspended pending final judgement of the case of China Construction Fifth Division at the Intermediate Court. In July 2009, China Construction Fifth initiated another litigation with the Shenzhen Intermediate People's Court, demanding the Company to make a payment of RMB75,563,000 for raw materials and staff deployment. The said cases are currently in trial. In October and November 2009, the Group further instituted two complaints with the Nanshan District People's Court, demanding China Construction Fifth to undertake a penalty payment for work delay in the amount of RMB30,615,000 and the payment of RMB39,537,000, representing the amount of work payments in excess of the total contract amount. Both trials are suspended. Based on the legal opinion furnished by lawyers engaged by the Company and the existing judgements and current progress of the case, it is difficult to predict the final outcome of the case at this stage. The directors are of the opinion that the aforesaid arbitration will not have any material adverse impact on the financial conditions and operating results of the Group.

13. CONTINGENT LIABILITIES (CONTINUED)

- (d) A lawsuit on breach of agreement and infringement of rights was instituted against the Company and its subsidiary ZTE (USA), Inc. ("ZTE (USA)") by Universal Telephone Exchange, Inc. (UTE) at the district court of Dallas, Texas, the United States, alleging that the Company and ZTE (USA) had violated a confidential agreement between UTE and ZTE (USA), for which UTE was seeking a compensation of USD20 million in actual damages. UTE further claimed that it had lost a telecommunications project contract as a result of inappropriate actions of the Company and ZTE (USA), for which UTE was seeking a compensation of USD10 million in actual damages and USD20 million in punitive damages. The compensation demanded by UTE as aforesaid amounted to USD50 million in aggregate. The Company's attorney filed a written response to the court denying UTE's charges against the Company and ZTE (USA). Meanwhile, the Company's attorney also disputed the jurisdiction of the said U.S. court over the Company. On 8 February 2011, UTE filed a Discovery Request in respect of the Company and ZTE (USA) in response to the dissent on jurisdiction raised by the Company, and the court gave permission to UTE to conduct investigations in respect of the issue. Our attorney disputed the Discovery Request filed by UTE and applied to the court for the lawsuit to be dismissed on the grounds that UTE's business license in Texas was terminated on 21 May 2010 and therefore, according to Texan laws, had no right to institute lawsuits in Texas or to require the Company to disclose any relevant information. On 29 March 2011, UTE pleaded the court to reject ZTE (USA)'s dissent and to rule in favour of UTE's rights to institute relevant legal actions. The case is currently pending court trial. Based on the legal opinion furnished by the legal counsel engaged by the Company and the existing judgements and current progress of the case, it is difficult to ascertain the final outcome of this case at the present stage.
- (e) Telefonaktiebolaget LM Ericsson (publ) ("Ericsson") instituted a lawsuit against ZTE (UK) LIMITED (ZTE (UK)), a wholly-owned subsidiary of the Company, alleging infringement on Ericsson's patent technologies by several handset models of ZTE (UK) and demanding ZTE (UK) to discontinue such act of infringement and compensate for Ericsson's losses. The Company filed a defense on 20 June 2011 and the case is currently pending trial to be scheduled by the court. On 1 April 2011, Ericsson applied to the Court of Rome for provisional injunction procedures against ZTE Italy S.r.l. ("ZTE Italy"), the subsidiary of ZTE in Italy. Such request was rejected by the court, which ordered Ericsson to serve a claim on ZTE Italy. In response to the aforesaid claims, ZTE Italy submitted its defense to the court and requested the court to reject the litigation claim of the claimant. As at the end of the reporting period, the ruling of the court had not been officially served upon the two parties. On 14 April 2011 and 23 May 2011, Ericsson filed lawsuits against ZTE Deutschland GmbH ("ZTE Deutschland"), a wholly-owned subsidiary of the Company, with the district court of Dusseldorf and the district court of Mannheim in Germany, respectively, alleging infringement of Ericsson's patent technologies and demanding ZTE Deutschland to discontinue such act of infringement and compensate for Ericsson's losses. The local courts have initially set the amount in dispute in this case at EUR10.80 million and EUR2.275 million, respectively. ZTE Deutschland is currently preparing for its defense. Based on the legal opinion furnished by the legal counsel engaged by the Company and the existing judgements and current progress of the case, it is difficult to ascertain the final outcome of this case at the present stage. The Directors are of the view that the aforesaid case will not have any material and adverse impact on the financial conditions and results of operation of the Group for the current period.

13. CONTINGENT LIABILITIES (CONTINUED)

- (f) On 5 April 2011, a certain customer in Ecuador filed an application for arbitration with the Business Arbitration Tribunal of Guayaquil, Ecuador, claiming that the construction project by the Company had quality problems, thus it claimed USD22.25 million for the cost of rebuilding the network, and USD1.1 million for the cost of monitoring and managing the construction quality of the entire network, totaling USD23.35 million. In response to the demand for arbitration, the legal counsel engaged by the Company has submitted a defense in a timely manner to deny all allegations. Based on the legal opinion furnished by the legal counsel engaged by the Company and the existing judgements and current progress of the cases, it is difficult to ascertain the final outcome of this case at the present stage. The Directors are of the view that the aforesaid case will not have any material and adverse impact on the financial conditions and results of operation of the Group for the current period.

Save as disclosed above, the Company and the Group had no other significant Contingent liabilities as at 30 June 2011.

14. OPERATING LEASE ARRANGEMENTS

The Group leases certain of its offices under operating lease arrangements, with leases negotiated for terms ranging from 1 to 5 years.
