Source of funds for derivative investment				Internal funds										
Litigation (if applicable)				Not involved in any litigation										
Date of announcement of the Board of Directors in respect of derivative investments (if any)				Announcement Resolutions of the Fifteenth Meeting of the Eighth Session of the Board of Directors” and “Overseas Regulatory Announcement Announcement on the Application for Derivative Investment Limits for 2020” both dated 27 March 2020.										
Date of announcement of the general meeting in respect of the approval of derivative investments (if any)				“Announcement on Resolutions of the 2019 Annual General Meeting” dated 19 June 2020.										
Risk analysis and control measures (including but not limited to market risks, liquidity risks, credit risks, operational risks and legal risks) in respect of derivative positions during the reporting period				<p>Value-protection derivative investments were conducted by the Company during the first quarter of 2021. The major risks and control measures are analysed and discussed as follows:</p> <ol style="list-style-type: none"> Market risks: Gains or losses arising from the difference between the exchange rate for settlement of value protection derivative investment contracts and the exchange rate prevailing on the maturity date will be accounted for as gains or losses on revaluation for each accounting period during the effective period of the value-protection derivative investments. Effective gains or losses shall be represented by the cumulative gains or losses on revaluation on the maturity date; Liquidity risks: The value-protection derivative investments of the Company were based on the Company’s budget of foreign exchange payment and receipt and foreign exchange exposure and these investments matched the Company’s actual foreign exchange payment and receipt to ensure sufficient fund for settlement on completion. Therefore, their impact on the Company’s current assets was insignificant; Credit risks: The counterparties of the derivative investment trades of the Company are banks with sound credit ratings and long-standing business relationships with the Company and therefore the transactions were basically free from performance risks; Other risks: Failure of personnel in charge to operate derivative investments in accordance with stipulated procedures or fully understand information regarding derivatives in actual operation may result in operational risks; obscure terms in the trade contract may result in legal risks; Control measures: The Company addressed legal risks by entering into contracts with clear and precise terms with counterparty banks and strictly enforcing its risk management system. The Company has formulated the “Risk Control and Information Disclosure System relating to Investments in Derivatives” that contains specific provisions for the risk control, approval procedures and subsequent management of derivative investments, so that derivative investments will be effectively regulated and risks relating to derivative investments duly controlled. 										
Changes in the market prices or fair values of invested derivatives during the reporting period, including the specific methods, assumptions and parameters adopted in the analysis of the fair values of the derivatives				The Company has recognised gains/losses from investments in derivatives during the reporting period. Total gain recognised for the reporting period amounted to RMB164 million, comprising gain from fair-value change of RMB216 million and recognised investment loss of RMB52 million. The calculation of the fair value was based on forward exchange rates quoted by Reuters on a balance sheet date in line with the maturity date of the product.										
Statement on whether the accounting policy and accounting audit principles for derivatives for the reporting period were significantly different from the previous reporting period				There was no significant change in the Company’s accounting policy and accounting audit principles for derivatives for the reporting period as compared to that of the previous reporting period.										
Specific opinion of Independent Non-executive Directors on the Company’s derivative investments and risk control				<p>Independent Non-executive Directors’ Opinion:</p> <p>The Company has conducted value protection derivative investments by using financial products to enhance its financial stability, so as to mitigate the impact of exchange rate volatility on its assets, liabilities and profitability. The Company has conducted stringent internal assessment of its derivative investments made and has established corresponding regulatory mechanisms and assigned dedicated staff to be in charge thereof. The counterparties with which the Company and its subsidiaries have entered into contracts for derivative investments are organisations with sound operations and good credit standing. The derivative investments made by the Company and its subsidiaries have been closely related to their day-to-day operational requirements and the internal review procedures performed have been in compliance with the provisions of relevant laws and regulations and of the Articles of Association.</p>										

Note 1: Derivative investments are classified according to the types of derivative investment. Foreign exchange derivatives include exchange forwards and structural forwards and exchange swaps. Interest rate derivatives are interest rate swap;

Note 2: The investment amount at the beginning of the period represented the amount denominated in the original currency translated at the exchange rate prevailing as at the end of the reporting period;

Note 3: Net assets as at the end of the reporting period represented net assets attributable to holders of ordinary shares of the listed company as at the end of the reporting period.

3.7 This quarterly report is published in both Chinese and English. In case of any discrepancy between the Chinese and English versions, the Chinese version shall prevail.
